SAVE LIVES

PREVENT

TRAGIC DUSK to DAWN DEER - VEHICLE COLLISIONS

New Statistical Analysis Based on Extensive Road Test Data Proves

78% - 90% Effective
Preventing 4 out of 5 accidents
that would otherwise occur

WILD ANIMAL HIGHWAY WARNING
REFLECTOR SYSTEM

The Most Cost-Effective Method Of Preventing Deer-Vehicle Collisions

STRIETER-LITE® Wild Animal Highway Warning Reflector System

Spacing of the reflectors along each roadside is equal to the distance between the reflector lines, resulting in complete coverage.

Headlights from passing vehicles strike the reflectors, reflecting flashes of dim light across the road.

The unnatural moving light patterns deter deer from crossing the roadway until vehicles pass.

The reflected light is not seen by the motorist.

Reflector flashes off dim light 500' angles horizontally & vertically.

- Works best at dawn when majority of deer vehicle collisions occur
- Reduces estimated \$30,000 yearly deer vehicle collisions
- Reduces human fatalities and injuries
- Reduces loss of wild animals
- Reduces vehicle damage

System pays for itself in only 4-6 mo. accidents are prevented in 1 mile of road.

Used and tested throughout the world. Available in 10' and 20' sections. Contact: STRIETER-LITE, 1000 North 10th Avenue, Suite 100, Denver, CO 80202. Phone: (303) 733-1111. Fax: (303) 733-1112. Website: <http://www.strieter-lite.com>
