Subject: RE: Second Draft--better

Neena,

I've reviewed the amendment you proposed and have no objection to it. However, I suspect the Bill sponsor may, since it effectively removes vehicles from the testing scheme.

2. Prior to implementing the inspections required pursuant to NRS 445B.795, subsection 1(c), the Commission shall, by regulation, adopt testing procedures for those vehicles with a gross vehicle weight range of 8,500 to 10,000 pounds, and which are powered by special fuel.

3. The Commission shall not establish emission standards for liquefied petroleum gas, until such time that federal standards have first been established.

(Possible alternative language subsection 3: Regulations adopted pursuant to subsection 2 related to the testing of vehicles powered by liquified petroleum gas or compressed natural gas shall be in conformance with federal standards and guidelines for testing of those vehicles.)

Let me know if you have any questions. I intend to forward our proposed language (Sub. 2 only) to Linda today for inclusion with the Bill.

Thanks,

Russ
