Budget Narrative Cost Proposal

The Clear Creek Youth Center has been in existence since 1965 with minimal funds identified for capital improvement or expansion. During this past legislative session, funds were allocated for major repairs and maintenance. If the Nevada FFA foundation and the state can come to an agreement, it is the intent of the foundation to seek private and/or corporate funding to expand and/or enhance the opportunities provided by the center. The following identifies some of the major capital improvements that may be implemented:

Projected Income

Income would be utilized based on the current usage of and increased usage of the facilities. Aggressive marketing of the facilities is crucial to the increase of usage needed for the success of this project. It was stated that the facilities are at a current 80 percentage usage level. This could not be correct based on the capacity of the facilities. The facilities will sleep 224 each night for 365 days. That creates a total possible usage number of 81,760 usage. Last year, usage was around 5,800. This is a 7 percent usage. Many camps across the nation average 50 percent usage. The foundation based the first usage number on a 15 year average and increased usage by 50 percent the second and third year based on marketing. It then increased 10 percent each year until it leveled off at a safe 43 percent average usage. The foundation considers the usage figures, and the budgeted income conservative.

The foundation increased the overnight fee from \$6.50 to \$12 per night. We feel this is a necessity in order to meet a breakeven to profit level of production for the facilities. Averages of camps in Nevada and other states are from \$12 to \$15. The Nevada 4-H Camp in Lake Tahoe, within 15 miles of Clear Creek, charges \$14 per person overnight fee. This change enables us to be very competitive.

Meal income is based on the maintenance of the current contract.

While researching other FFA camps that are managed by FFA foundations in other states, the foundation discovered that independent sports camps are a financially beneficial project to increase revenue for this type of facility. By managing a three day sports camp, you can increase income versus rental by 600%. These funds will be focused on capital improvement and repairs to the facilities.

Projected Expenses

Annual lease of facility expense is not a line item in the budget, because the FFA foundation would prefer to an agreement of \$5,000 minimum placed towards capital improvements of the facilities in lieu of a lease amount payment to the state. This ensures that ongoing improvement on the state's facilities are maintained.

Personnel Expenses is based on the Nevada FFA Foundation's current salary and the needed increase of the camp director/maintenance position required by this project. The salaries would increase by 4% each year and would include use of one house per each salaried position. The amounts budgeted include all benefits and would be contracted through Great Basin Community College.

- The executive director would be responsible for all fiscal and booking activities associated with the camp.
- The camp director/maintenance position would be responsible for the daily management of the facilities and all maintenance. There are many qualified persons available through the parks and recreation departments in universities across the western United States.
- Student interns would be hired to assist the camp directors with daily maintenance and improvement of the facilities. Agriculture education students are trained for these types of activities at the secondary education level.

Operating Expenses are based on current expenditure levels of the camp and increased cost of activities needed to increase usage of the facilities. The current expenses associated with operations of the FFA foundation are included.

- Marketing Expense, see response to question 4.2 of RFP in the Cost Proposal.
- The cost of the sports camps operated each year are also included as a separate operating expense each year.

Equipment expenses are based on long term replacement over ten years of needed equipment. Much of the existing equipment is antiquated and in need of replacement. The budget is designed to replace most existing equipment.

The meal contract expense is based on the current contract agreement between the state and a private vendor. The FFA foundation would prefer to maintain this contract.

The utilities expense is based on the current cost levels of the facilities and the projected level of increased activities and usage of the facilities.

Maintenance and building expenses are explained by the descriptions of the needed capital improvements that are listed by year in the following pages. Much of the capital improvements will be done in the first five years of the project

First Year:

- Tools & Hand Equipment- The project will need a initial cost for needed hand
 equipment that will vary once an inventory has been performed by the state of
 what equipment will be available with the camp. These tools will be utilized to
 carry out much of the building maintenance, and could range from shovels and
 rakes to paint spray rigs and compressed nail gun equipment. It is difficult to
 identify with great detail until an inventory is performed.
- Landscape Development- The Nevada FFA Foundation will work with high school agriculture programs in the state to start immediately landscaping and cleaning up existing fire hazards around the buildings on the facilities.
- Sand Volleyball Court- At very little cost, the volleyball court will be developed as an additional draw to the center. Again, agricultural education students will be asked to assist in the construction of the project.
- Building Maintenance- The buildings located on the facilities are structurally sound but in need of ongoing improvements and repairs. Paint, structure repair, flooring, roofing, plumbing, and all other needed repairs will be implemented each year.

Second Year:

- Activities Field- A large grass field that could be marketed to increase the use of the Clear Creek facility. Interns and students of agricultural education programs would provide the labor as a community service.
- Landscape Development- The Nevada FFA Foundation will work with high school agriculture programs in the state to landscape and clean up around the buildings on the facilities.
- Tennis/Basketball Court Repair- This would consist of repairs made on existing courts. These repairs are necessary to render the courts useable. At this time, these courts are not safe for use. These repairs would be among others during the second year of the project.
- Ground Level Ropes/Obstacle Course- Funding will be sought for the
 development of the ropes course for the purpose of providing leadership training
 activities to various youth and adult groups. This activity, used nation-wide,
 helps individuals to acknowledge their fears and assist them in improving their
 self-esteem and enhancing their leadership skills. This addition provides more
 diversified opportunities for the center.
- Amphitheater- The addition of the amphitheater will provide another dimension to the opportunities of the center. This construction of the amphitheater is projected

during the second year of occupancy. As a community service activity, an agricultural mechanical engineering class will assist in the construction of this project.

 Building Maintenance- The buildings located on the facilities are structurally sound but in need of ongoing improvements and repairs. Paint, structure repair, flooring, roofing, plumbing, and all other needed repairs will be implemented each year.

Third Year:

- Camping Area and Trail Development- This project will be developed by student interns, Agricultural Education students performing community service activities, and the U.S. Forest Service. This can be constructed for little or no cost.
- Building Maintenance- The buildings located on the facilities are structurally sound but in need of ongoing improvements and repairs. Paint, structure repair, flooring, roofing, plumbing, and all other needed repairs will be implemented each year.

Fourth Year:

 Building Maintenance- The buildings located on the facilities are structurally sound but in need of ongoing improvements and repairs. Paint, structure repair, flooring, roofing, plumbing, and all other needed repairs will be implemented each year.

Fifth Year:

• Building Maintenance- The buildings located on the facilities are structurally sound but in need of ongoing improvements and repairs. Paint, structure repair, flooring, roofing, plumbing, and all other needed repairs will be implemented each year.

The capital improvements that are needed for the project are considerable. It should be noted that approval of the projected Facilities Master Plan from the appropriate state agency will be requested by the Nevada FFA Foundation before improvement activities will occur. It should also be noted that the accomplishment of the above is based upon earnings generated by the facilities and the foundation's ability to acquire grant funding from private and/or corporate source. We did not include projected donations in the budget, but we feel this will be a substantial amount to assist with the capital improvements.

BUDGET NARRATIVE DETAIL NEVADA FFA FOUNDATION CLEAR CREEK YOUTH CENTER PROPOSAL

PROJECTED	Projected income will be generated from overnight	Fiscal Year 2004
INCOME	and day use fees, building rentals, food services,	July 1,2003 to
	state subsidies, and aggressive grant writing.	June 30, 2004
Dorm Fee	This budget item is based on a fourteen-year	\$104,832.00
	average of 8,736 overnight users of the Clear Creek	4 - 2 - 2 , - 2 - 2 - 2
	facility from 1986-1999. The overnight fee in the	
	operation would increase from \$6.50 to \$12 dollars.	
	This is a five and half dollar increase to enable the	
	camp to start operating at a breakeven to profit	
	level. The camp will also have a minimum usage	·
	fee based on 50 persons. This is to ensure that the	
	facility will operate without state support. The	
	FFA foundation will also apply for many start-up	
	and operational funds from private foundations.	
	Many private foundations have a significant history	
	of funding youth centers with a diverse population	
	usage.	
Facilities	This income figure is based on rental of one house	\$22,500.00
	and two mobile homes. This income will decrease	
	over the life of the project as the housing is utilized	
	as a wage piece for project managers.	
Meals	This fee will remain the same based on the current	\$174,720.00
	contractor. An average cost of \$20 was used for this	
	figure. This figure is based on the facility usage	
	average over 14 years of 8,736.	
Gym Fee	For the purpose of day use of the facilities, a	\$6,000.00
	\$150.00 fee would be applied to a group that would	
	use the gym. The income is based on 40 uses.	
FFA Foundation	This is the amount of funds the FFA Foundation	\$47,000.00
Support of Camp	will put toward the management of the Clear Creek	
	Youth Center. The funds would be used to support	
	the executive director's position.	
Sport Camp	The FFA foundation plans to create a new funding	\$180,000.00
Income	source for the facilities improvement and operation	
	through the hosting and management of youth	
	sports camps. A minimum of four, three day sports	
	camps would be created for boys and girl's	
	basketball, boy's wrestling, and girl's volleyball.	
	Major college coaches would be hired for three	
	days of each camp and \$250 would be charged for	
	each student that participated. This fee is \$100 less	

	than most camps. The camps would target 180	
	students for each one.	
Sound Equipment	Audio equipment is currently available through the	\$6,000.00
Usage	Nevada FFA Foundation and would be included	
	with the use of the facilities. This will be used as	
	part of the Marketing Strategy. The income is based	
	on 40 users during the year at a cost of \$150 dollars	
	per use.	
Day Use Fee	The day use fee of facilities is \$7.50 dollars per	\$0.00
	person with a minimum usage fee based on 50	·
	persons. The Governor's Office bases the usage	
	figures on 2,500 individuals the first year as	
	described by the potential usage report. For the	
	purposes of this proposal, the foundation did not	
	identify income for day use due to the poor	
TOTAL	reliability of number of day users.	\$5.41.052.00
TOTAL	This is the anticipated gross income.	\$541,052.00
INCOME		
PROJECTED		
EXPENSES		
Personnel	·	
Expenses		
Executive	This position is currently in existence and is funded	\$47,000.00
Director	by the FFA foundation. This would be the	
	management agent of the facilities and project.	
	Included is a resume of the FFA foundation's	
	executive director for review. The foundation feels	
	this position is a natural fit due to her experience in	
	marketing, advertising, and communications. The	
	budget amount includes benefits and workers	
	comp.	
Youth Center	This position would be funded through revenue	\$30,000.00
Director	generated from the marketing of the center. This	4-0,000.00
Director	salary would be combined with the use of one of	
	the three houses. The position would oversee the	
	day-to-day operations of the facility and would help	
	manage the capital improvement projects. This	
	position would also handle all maintenance of	
	facilities. The budget amount includes benefits and	
	workers comp.	#10.000.00
Student Internships	This will be an expanding program that will enable	\$10,000.00
l	the camp to utilize a low cost workforce while	
	providing a learning experience for secondary and	
	postsecondary students. Over the length of the	
1	project, the number of interns will increase with the	

	T. T	· · · · · · · · · · · · · · · · · · ·
	increase in the center's needs. Agriculture	
	Education students in Nevada would largely make	
	up the potential interns. These students are trained	
	at the high school level for facility maintenance and	i
	landscaping.	
Personnel Total	This is the total funds, state and foundation, utilized	\$87,000.00
	for personnel.	
Operating		
Expense		
Inspection and	This is the current cost incurred with various health	\$1,500.00
Certification	and safety inspections.	
Insurance and	The FFA foundation was quoted a liability	\$5,000
Bond	insurance bond. The bid was quoted by one of the	·
	FFA Foundation's partners, Nevada Farm Bureau.	
Marketing	This is the cost of marketing supplies and fees. For	\$30,300.00
Ĭ	more budget detail, reference the marketing plan	·
	within this proposal. The budget increases by	
	\$48,000 the second year through the tenth based on	
	paid print ads.	
Office Equip.	This expenditure will cover cost incurred with	\$300.00
Repair & Maint.	minor office equipment repair and maintenance.	,
Operating Supply	This expenditure will maintain the daily needs for	\$1,200.00
op	small office supply. (i.e. Paper, pen, print	4 - , - .
	cartridges)	
Postage	This is the cost of postage for the general	\$1,500.00
	management of the youth center.	
Print and Copy	This expenditure will cover any of the cost incurred	\$1,000.00
op/	through contracted copy or print services.	
Rentals	This expenditure will cover costs associated with	\$2,000.00
	rental fees for equipment.	, ,
Telephone	This is the cost of telephone service associated with	\$2,400.00
1 oropiiono	the operation and management of the youth center.	4-7
Vehicle Operation	This will cover the cost of fuel and maintenance of	\$2,500.00
vomoto operation	camp vehicles that are state owned.	42,5 00.00
Sports Camp Cost	This is the expenditure of 4 sports camps for	\$60,000.00
Sports Camp Coor	students. Each camp would cost \$15,000 for	400,000.00
	advertising, coach salary, meals, and awards.	
OPERATING	The contract of the contract o	\$107,700.00
TOTAL		4-577. *****
Equipment		
Expense		
Furnishings	This would cover cost of desks and furnishing in	\$0.00
1 minomigo	the Administration Building to operate the	Ψ0.00
	facilities. This line item is not utilized until the	
	second year of the project.	

Bunk Beds This would replace the antiquated hospital beds in the dorms with new modern bunk beds. The bunk	
had would also in an an about an annual attitude	
beds would also increase the number usage ability	
of the facility. Each dorm would be able to	
increase holding capacity by two thirds. This line	
item will not be utilized until the fourth year of the	
project.	ļ
Folding Tables This line item would cover new tables for the \$0.00	
education building to increase usage. The table	
dimension of the folding tables would be 18" x 72"	
at a total count of 40 for \$65 dollars each. This line	
item would fall into the third year of the project.	
Folding Tables This line item would cover new tables for the \$0.00	
education building to increase usage. The table	
dimension of the folding tables would be 36" x 72"	
at a total count of 40 for \$60 dollars each. This line	
item would fall into the fourth year of the project.	
Stacking Chairs This line item would cover new stacking chairs for \$0.00	
the education building to increase usage. The	
chairs would cost \$30 each at a total count of 400.	
This line item would fall into the third, fourth and	
fifth year of the project. Fry Cooker This would replace the current fry cooker that is not \$3,000.0	10
	,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,
in working condition. General Kitchen This would be an ongoing investment to improve \$0.00	
Equipment the kitchen facilities. Starting in the second year of	
the proposal this would be funded at \$5,000.00.	<u> </u>
Computers, office This equipment would be utilized in the \$2,000.0	טי
equipment administration building and utilized to continually	
increase the efficiency of the management of the	
facilities.	
4X4 Work Truck This vehicle would replace the usage of state \$0.00	
owned and operated vehicles as needed for cleanup,	
repair and maintenance of the facilities. A plow	
would also be purchased for snow removal which	
would be operated by center staff only. This would	
not be purchased until the eighth year of the	
project.	
Mule Utility This is a utility vehicle that would be used by staff \$0.00	
Vehicle and interns for cleanup, repair and maintenance of	1
the facilities. This would be purchased the second	
year of the project at a cost of \$7,000.	
Landscape Tractor This would be a small tractor that would include a \$0.00	
front-end loader, backhoe, mower, spray rig, and	
scraper. This would be used for landscape, cleanup	

	and maintenance of the facilities. This would be	
	used by the center staff, and would not be	
	purchased until the second year of the project. The	1
	budgeted amount is \$20,000.00.	
6 Foot Mower	This would be a three wheel front mower that	\$0.00
	would be utilized to maintain new lawn areas	
	created in the first two years of the project. This	
	would not be purchased until the second year of the	
	project. The budgeted amount is \$10,000.00.	
EQUIPMENT TOTAL		\$5,000.00
Category 500	Maintenance and Building Expense	
Tools and Hand	This would cover the cost of hand tools needed for	\$5,000.00
Equipment	clean up, maintenance, and improvements made on	4.,
	the facilities during the project. This cost would be	
	incurred during the first year of the project.	
Building, Paint &	This budget item would be used to improve and	\$5,000.00
Maintenance	upgrade all camp buildings through paint, flooring,	40,00000
	wall repair, roofing, etc This budget amount	
	increases each year of the proposal.	
Landscape	These funds would be utilized in an ongoing	\$5,000.00
Development	landscape project to beautify the building areas of	, , , , , , , , , , , , , , , , , , ,
	the facilities. This would be done to make the	
	facilities more appealing to a larger market. The	
	plan would be to keep the improvements based	
	within the rustic setting of the camp. This plan	
	would also have a large focus on cleaning up	
	border areas around the camp to reduce what is	
	perceived as a significant fire hazard. This would	
	happen over the budgeted ten years of the project.	
Activities Field	This fund would be utilized to cover the cost of	\$0.00
	supplies to create a large grass field that could be	
	marketed to increase the use of the Clear Creek	
1	Facilities. Interns, and students of agriculture	
	education programs would provide the labor as a	
	community service. This would not start until the	
	second year of the project.	
Ground Level	This is another addition to the center that would be	\$0.00
Ropes Course	utilized by the marketing effort of the facilities.	
_	This would be under the supervision of the center	
	director. This would not be utilized until the	
`	second year of the project. This is a common	
	leadership based activity for youth camps. This	
	would be a ground level course to keep insurance	
	premiums low and reduce liability hazards.	

		<u> </u>
Indoor Swimming	This is another addition to the center that would be	\$0.00
Pool	utilized by the marketing effort of the facility to	
	increase use of the center. This would not take	
	place until the seventh year of the project. This	
	could increase usage by swim teams across the state	
	as a training facility.	
Camping Area	This would be created by the use of student interns,	\$0.00
	Agriculture and Natural Resource community	40.00
	service, and the US Forest Service. This could be	
	done little to no cost.	
Amphitheater	This would be another improvement of the facility	\$0.00
Amphilileater	l	\$U.UU
	that will increase usage. The supplies would be	
	covered by the budget during the second year. An	
	agriculture mechanical engineering class as a	
	community service project would assist with the	
0 177 11 1 11	work.	01.000.00
Sand Volleyball	This would be created with little cost. This is	\$1,000.00
Court	another common activity for most youth camp	
	facilities.	
Tennis / Basketball	This would consist of repairs made on existing	\$0.00
Court Repair	recreational courts. These repairs would make the	
	courts usable. At this time they are in poor to	
	unusable shape. This would be among the repairs	
	created during the second year of the project. The	
	FFA foundation would rely on a working	
	relationship with Granite Construction to help with	
	this project.
