INCENTIVES: OVERVIEW

Incentives are broadly defined as any tax credit or abatement of corporate income, personal income, sales and use tax, property or other taxes to retain or lure businesses.

During the past two decades, states have expanded their economic development “arsenal” with programs to create, retain or expand jobs. Some states have targeted industries and used customized, company-specific incentives to engage in bidding wars with other states.

The result: Interstate competition for industries and businesses is becoming increasingly intense.

Why do we have incentives?

Incentives are cost-effective. They induce the injection of “new money” into Nevada’s economy and provide for multiplier when you factor in the wages from indirect or induced jobs.

Incentives allow us to be competitive. More than 75 percent of the states have automatic sales and use tax exemption on capital purchases. Nevada’s Sales & Use Tax Abatement enables qualifying companies to apply for sales tax relief.

Incentives provide for quality job creation. We look at the quality, not the number of jobs created, by mandating that applicant companies meet or exceed the average state wage and provide medical insurance plans.

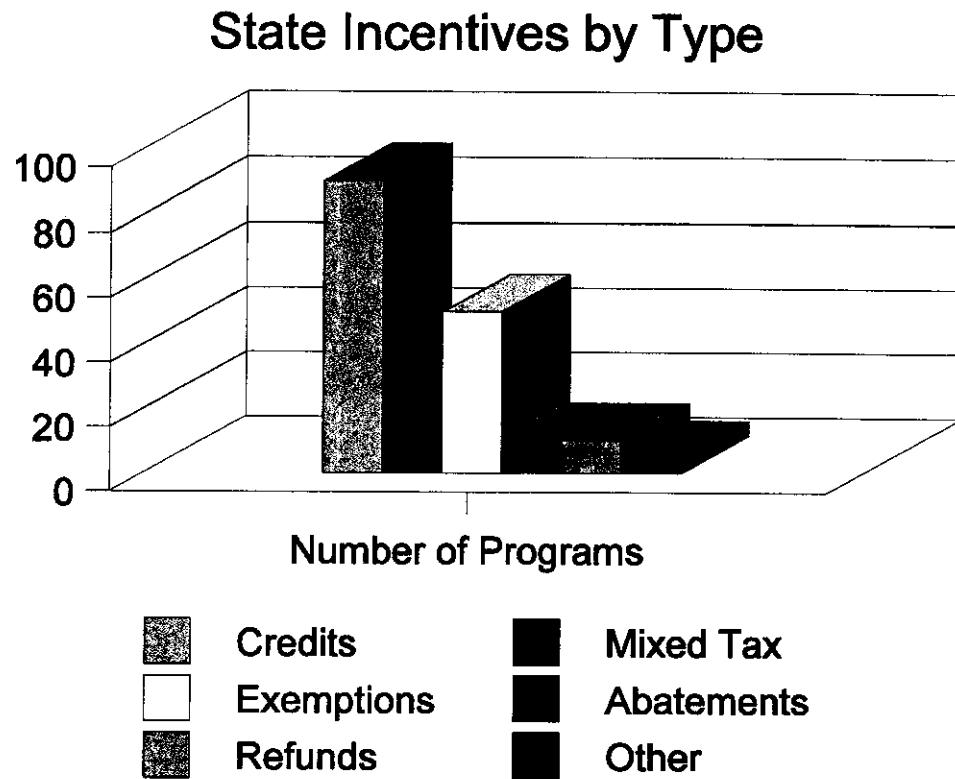

Incentives build commitment and long-term relationships. When a company receives an abatement, a contract must be signed that they will commit to doing business in Nevada for a minimum of 5 years. Companies that have received incentives typically turn to the state when they are ready to expand.

Why do companies look for incentives?

Incentives are cost-effective. When a company looks to relocate, they want to avoid up front costs and to get the best return on what will be a long-term investment.

Incentives make Nevada-based companies more competitive. By providing a lower cost of doing business, companies in Nevada are more competitive to their counterparts in other states.

INCENTIVES: OVERVIEW

Source: National Association of State Development

Authorities (a survey of all 50 states)

ECONOMIC DEVELOPMENT CRITERIA AND TERMS

Primary Job

A job where the revenue used to compensate the employee is generated from outside the economic region.

Wages (Private-Coverage Statewide Average Wage)

The total wages paid by all non-government employers, divided by the total number of non-government (or private) employees reported in the state. A factor of 2080 is then applied to determine the hourly rate.

Value of Jobs to Economy

For years, the benchmark in economic development has been the “number” of jobs created. The Commission uses the “amount” of wages generated as its benchmark because wages are more critical in successful economic development. This is the basis for the Commission’s emphasis on “above average wage primary jobs.”

Nevada’s Investment

Abating, deferring, or exempting a tax that may be due for the purpose of inducing a company to relocate or expand, therefore creating economic development.

Capital Investment

The capital expenditure required by NRS to apply for incentives.

Capital Equipment

Equipment classified as personal property and depreciable according to IRS regulations. By NRS it does not include buildings or their structural components, equipment used by a public utility, in mining, in gaming, in retail or for medical treatment.

Abatement

The relief of a portion of a particular tax that may be due.

Deferral

The delay of payment of a particular tax that may be due.

Exemption

The relief of all of a particular tax that may be due usually by statute.

Direct Impact

The impact which comes from the employment of primary jobs.

Indirect Impact

The economic effect of the jobs created because of a new primary employer.

The companies and the jobs providing goods and services to the company would be indirect jobs.

Induced Impact

The economic impact from jobs created because of the spending from earnings of the direct and indirect jobs. These "induced" jobs would provide goods and services to the direct and indirect job-holders.

Total Impact

The total of all direct, indirect and induced impacts.

MISSION STATEMENT

The Nevada Commission on Economic Development promotes a more diversified and prosperous economy enriching the quality of life for Nevada residents by stimulating business expansion and retention, encouraging entrepreneurial enterprises, and attracting businesses to create economic growth in Nevada, and assisting with community development.

NEVADA'S INCENTIVES

To provide economic diversification from gaming, hospitality and mining industries by attracting basic industries, the Nevada Legislature has approved and defined 6-tax related incentive programs and one training program to make Nevada's business climate attractive.

Programs

- **Sales & Use Tax Abatement**
- **Sales & Use Tax Deferral**
- **Business Tax Abatement**
- **Personal Property Tax Abatement**
- **Recycling Property Tax Abatement**
- **Renewable Energy Abatements**
- **Train Employees Now (TEN)**

Applicant Criteria/Corporate Responsibility

- **Provide medical insurance plan for all employees including an option for dependent health insurance coverage.**
- **Register and obtain all licenses and permits required by the state, city and county in which the business operates.**
- **Meet or exceed the statewide average hourly wage—currently \$15.48.**
- **Create the proposed number of full-time jobs, and continue the employment of Nevada residents.**
- **Make the capital investment required for the type of business or expansion based on county/city population.**
- **Commit to maintaining a business in Nevada for at least 5 years.**

SALES & USE TAX ABATEMENT

NRS 374.357 (1995), 360.750 (1999)

In Nevada, sales and use tax abatements are available for purchases of capital equipment.

- Capital equipment purchases are automatically exempt from sales and use taxes in **38** states. **5** states don't charge any sales tax.
- This is Nevada's most commonly used abatement.
- It injects "fresh money" into Nevada's economy in the form of added wages.
- The companies receiving this incentive in the past 2 calendar years injected **\$113 million** into the economy.
- Pay it forward: \$113 million subsequently created **\$274 million** impact in direct, indirect and induced economic activity.

Sales & Use Tax Abatement Activity

Fiscal Year	Number of Companies	Number of Jobs Created	\$\$ in Direct Wages
1999	21	1,345	\$ 40,778,234.00
2000	17	1,509	\$ 48,062,809.00
2001	22	1,454	\$ 81,462,285.00
2002	12	827	\$ 35,512,277.00

SALES & USE TAX DEFERRAL

NRS 372.397 (1985), 360.750

In addition to the Sales & Use Tax Abatement, companies may also apply for a Sales & Use Tax Deferral on purchases of capital equipment.

- **Deferrals only require 80 percent of the statewide average wage since the tax is guaranteed to be paid over time.**
- **Deferrals can apply to total sales or use tax, but is usually only applied to the 2 percent constitutional sales tax.**

BUSINESS TAX ABATEMENT

NRS 364A.170 (1991), 360.750

A quarterly business tax in the amount of \$25 per full-time equivalent employee (FTE) is imposed for the privilege of conducting business in Nevada. A new or expanding business may qualify for a tax abatement if it meets both the statutory and regulatory requirements established by the Nevada Commission on Economic Development.

- This is the state's second most commonly used abatement.
- Companies may receive an abatement on a sliding scale equal to 50 percent for a period of four years.
- The Commission has used this program to effectively leverage a few dollars of abatement to tens of millions of dollars worth of new wages and new property tax revenue annually.

Business Tax Abatement Activity

Fiscal Year	Number of Companies	Number of Jobs Created	\$\$ in Direct Wages
1999	6	895	\$ 27,431,456.00
2000	15	1,423	\$ 45,237,378.00
2001	21	1,318	\$ 71,779,303.00
2002	12	827	\$ 35,512,277.00

PERSONAL PROPERTY TAX ABATEMENT

NRS 361.0687 (1993), 360.750

Partial abatement from personal property taxes is available to companies who locate or expand their business in Nevada. The applicant must apply for abatement not more than 18 months before the business begins to develop for expansion or operation in Nevada.

- Companies may receive up to 50 percent abatement of taxes due on personal property for up to 10 years.**
- This means the local communities will receive new additional revenue, plus the fact they were receiving revenue before, in the case of expansion companies.**

RENEWABLE ENERGY ABATEMENTS

NRS 374.357 (1995), 360.750, 361.0687

For those companies involved in the production of energy from renewable sources such as wind, solar, and others, there is a package of abatements available including sales/use tax and property tax.

Partial abatement of real and personal property taxes for businesses that produce electricity from renewable energy, who locate or expand their business in Nevada. The applicant must apply for the abatement not more than 18 months before the business begins to develop for expansion or operation in Nevada.

- **Company may receive a 50 percent abatement of real and personal property tax for 10 years.**
- **Partial sales/use tax abatement on capital equipment purchases.**
- **Although highly beneficial to the state, few companies qualify for the abatement because it is narrow in scope.**

TRAIN EMPLOYEES NOW (TEN)

NRS 231.068 (1985)

The Nevada Train Employees Now program provides short-term, skills-based, intensive job training to assist new and expanding firms reach productivity quickly. Each training program is designed jointly by the firm, the state and the university and college system.

- **TEN is not a tax-related incentive, but rather a direct subsidy to our community colleges to provide training.**

NEVADA'S SELECTED BUSINESS ASSISTANCE PROGRAMS – STATEWIDE

* A minimum two of the three parameters are required by statute.

Program → Description ↓	Sales & Use Tax Abatement	Business Tax Abatement	Personal Property Tax Abatement	Recycling Property Tax Abatement	Sales & Use Tax Deferral	Train Employees Now	Renewable Energy Abatements
NRS 374.357	NRS 364A.170	NRS 361.0687	NRS 361.0685	NRS 361.0687	NRS 372.397	NRS 231.068	NRS 361.0687 NRS 374.357
Partial sales/use tax abatement on capital equipment purchases	Abatement of: 80% for year one; 60% for year two; 40% for year three; 20% for year four	Not to exceed 50% abatement over a maximum of 10 years.	Up to 10 yr on real and personal property for qualified recycling businesses.	Tax deferral on capital equipment purchases	Grant		50% abatement for 10 years on real and personal property for qualified energy producers.
* Wage Requirement	100% of Statewide average hourly wage (currently \$15.48)						Partial sales/use tax abatement on capital equipment purchases.
* Number of Jobs Required Must be <i>primary jobs</i> – jobs where "...the revenue used to compensate the employee is generated from outside the economic region."	County/City Population >100,000/60,000 respectively: 75 full time employees County/City Population < 100,000/60,000 respectively: 25 full time employees Expansions – new employees on payroll increased by 10% or 6 employees, whichever is greater.				10 new full-time employees	At least 10 trainees	50% abatement for 10 years on real and personal property for qualified energy producers.
* Capital Investment Requirement	County/City Population >100,000/60,000 respectively: New - \$1 million County/City Population < 100,000/60,000 respectively: New - \$250,000 Expansions – equal to at least 20% of the value of tangible property possessed by the business.						100% of Statewide average hourly wage (currently \$15.48)
Amount of Award	Determined on a case by case basis.						Determined on a case by case basis.
Comments	5 yr commitment Local government notification	5 yr Commitment – Local government acknowledgement		50% of product components recycled on site.	5 yr Commitment Local government acknowledgement	Training done through community college	Minimum 10kw production capacity; Not for residential. 5 yr Commitment – Local government acknowledgement
