AN ACT relating to the Marlette Lake Water System; authorizing the issuance of revenue or general obligation bonds to finance the capital costs of improving and modernizing the Marlette Lake Water System; and providing other matters properly relating thereto.

Legislative Counsel's Digest:

Existing law creates the Marlette Lake Water System, which serves customers in Carson City, Washoe County and Storey County. Under existing law, the Department of Administration is required to supervise and administer the functions of the System. The Director of the Department must establish equitable rates to be charged for water service from the System. The rates must provide for the recovery of the major capital costs of improving and modernizing the System. (NRS 331.160) Money from the sale of water by the System is deposited in the Marlette Lake Water System Fund. (NRS 331.180)

This bill authorizes the Director of the Department to request the issuance of general obligations bonds of the State or revenue bonds to finance the capital costs of improving and modernizing the Marlette Lake Water System. The aggregate principal amount of the bonds must not exceed \$25 million. This bill requires the State Board of Finance to determine that sufficient revenue will be available in the Marlette Lake Water System Fund to pay the interest and installment payments as they become due before any revenue bonds are issued. This bill authorizes money in the Fund to be used to repay the bonds for which money in the Fund has been pledged.
