AN ACT relating to mental health; requiring a facility that provides services to persons who are mentally ill or mentally retarded or have related conditions to obtain input and participation of the client, the parent or guardian of the client or the legal guardian of the client under certain circumstances, in developing and modifying an individualized plan of services for the client; and providing other matters properly relating thereto.

Legislative Counsel's Digest:

Existing law provides for the regulation of facilities that provide services to persons who are mentally ill or mentally retarded or have other related conditions (Chapter 433 of NRS) and guarantees certain rights for clients of such facilities. (NRS 433.456-433.536) One of the rights guaranteed to a client of such a facility is the development and maintenance of an individualized written plan of certain services for the client which must provide for the least restrictive treatment procedures reasonably expected to benefit the client. (NRS 433.494)

This bill requires the individualized written plan to be developed and modified with the input and participation of the client, the parent or guardian of a client who is unable to provide input and participate and who is a minor, or the legal guardian of a client who has been adjudicated mentally incompetent.
