AN ACT relating to communicable diseases; revising provisions governing the testing of certain governmental employees who may have been exposed to a contagious disease while performing their official duties; and providing other matters properly relating thereto.

Legislative Counsel's Digest:

Under existing law, certain governmental employees, including law enforcement and correctional officers, emergency medical attendants and firefighters, who may have been exposed to a contagious disease while performing their official duties, or the employers of such persons, may petition a court for an order requiring the testing for exposure to the human immunodeficiency virus and the hepatitis B surface antigen of the person who may have caused the exposure to the contagious disease. (NRS 441A.195) **Section 1** of this bill expands those protections to county coroners and medical examiners and their employees, and also provides that the order issued by the court may extend to the testing of a decedent who may have caused the exposure to the contagious disease.
