AN ACT relating to air pollution; providing for additional exemptions from the requirements for the inspection of motor vehicles for the control of emissions; and providing other matters properly relating thereto.

Legislative Counsel's Digest:

Under existing law, the State Environmental Commission and the Department of Motor Vehicles must conduct a program for the control of emissions from motor vehicles in designated areas of a county whose population is 100,000 or more (currently Clark and Washoe Counties). (NRS 445B.770; NAC 445B.593, 445B.594) In those areas, a motor vehicle which has been registered for not less than 2 years may not be registered without evidence that the vehicle: (1) is equipped with the pollution control devices required by state and federal law; and (2) has passed an inspection to ensure that the devices are operating properly.

Sections 1 and 2 of this bill increase from 2 years to 3 years the period during which a motor vehicle may be registered without the submission of evidence that it complies with those requirements. Section 2 also provides that a hybrid electric vehicle may be registered without the submission of evidence that it complies with those requirements.
