EXPLANATION – Matter in *bolded italics* is new; matter between brackets ~~omitted material~~ is material to be omitted.

AN ACT relating to public works; authorizing a public body to contract with a construction manager at risk for the preconstruction and construction of a public work; setting forth the method for selecting a construction manager at risk; authorizing a public body to hire a construction manager as agent to assist the public body in overseeing the construction of a public work; requiring local governments to conduct a constructability review under certain circumstances before constructing certain public works; and providing other matters properly relating thereto.

**Legislative Counsel's Digest:**

**Sections 2-12** of this bill authorize a public body to enter into contracts with a construction manager at risk for the preconstruction and construction of a public work and provide the method for selecting a construction manager at risk. Under the construction manager at risk method for constructing a public work, a public body may enter into a contract for a negotiated price with a construction manager at risk to provide preconstruction services for the public work that include, without limitation, design support, construction estimating, value and system analysis and scheduling. After the public body has obtained the final design for the public work, the public body and the construction manager at risk are required to attempt to negotiate a contract for the construction manager at risk to construct the public work. If the public body and the construction manager at risk enter into such a contract, the contract must be for a guaranteed maximum price, a fixed price or a fixed price plus reimbursement for overhead and other costs and expenses related to the construction of the public work.

**Section 14** of this bill requires a local government or its authorized representative to conduct a constructability review to determine if the plans and specifications for a public work are complete and contain all necessary information,

18 if: (1) such plans and specifications are to be used for the first time on a public  
19 work; or (2) such plans and specifications are for a public work that has an  
20 estimated cost which exceeds \$10,000,000. This review must be performed by an  
21 architect registered pursuant to chapter 623 of NRS, a contractor licensed pursuant  
22 to chapter 624 of NRS or a professional engineer licensed pursuant to chapter 625  
23 of NRS.

24 **Sections 13 and 21** authorize a public body to employ a construction manager  
25 as agent to assist the public body in overseeing the construction of a public work. A  
26 construction manager as agent assists in the planning, scheduling and management  
27 of a public work without assuming any responsibility for the cost, quality or timely  
28 completion of the construction of the public work. A construction manager as agent  
29 is prohibited from taking part in the design or construction of the public work.
