Legislative Counsel's Digest:

Existing law governs the sterilization of pets that are released by various releasing agencies, including societies to prevent cruelty to animals, animal shelters, nonprofit entities that provide temporary shelter for pets and organizations that take into custody pets which have been abandoned, abused or neglected. (NRS 574.600-574.660) **Section 1** of this bill requires each licensed veterinarian to post in his office written notice of any sterilization requirements for dogs or cats required by local ordinance. **Section 1** further requires a governmental entity with jurisdiction over a public park to post written notice in the park of any sterilization requirements for the animals required by local ordinance. **Sections 2 and 3** of this bill require a retailer or dealer who sells a dog or cat to disclose to the purchaser **the name and address of the breeder of the dog or cat and** any sterilization requirements for the animal required by local ordinance. (NRS 574.460, 574.470) A retailer or dealer who fails to comply with the disclosure requirements is subject to an administrative fine imposed by the Director of the State Department of Agriculture in an amount not to exceed \$250 for the first violation, \$500 for the second violation and \$1,000 for each subsequent violation. (NRS 574.485) **[Section 3 also provides that any local ordinance which requires the sterilization of dogs may not be enforced with respect to a dog that is used primarily for hunting purposes relating to farming or agriculture, breeding or drawing heavy loads, or as a service animal or service animal in training.]**

Section 4 of this bill provides that a retailer, dealer or operator must not separate a dog or cat from its mother until it is 8 weeks of age or accustomed to taking food or nourishment other than by nursing, whichever is later. (NRS 574.500)
