EXPLANATION – Matter in *bolded italics* is new; matter between brackets ~~omitted material~~ is material to be omitted.

AN ACT relating to the subdivision of land; revising the requirements for the purchase of property for school construction; and providing other matters properly relating thereto.

Legislative Counsel's Digest:

Existing law sets forth a multistep process for obtaining approval for the subdivision of land. (NRS 278.320-278.460) One of the preliminary requirements is a determination of the need for a school in the area in which the subdivision is located. (NRS 278.330) If a school is needed, the subdivider is required to make suitable land within the proposed subdivision available for purchase by the school district at a price which does not exceed the fair market value of the land. ~~(NRS 278.346) This bill specifies that the time for the determination of the fair market value of the land for the purposes of this purchase is the time the tentative map of the subdivision is approved by the governing body or planning commission.~~

~~Existing law provides that if~~ **Under existing law, if** the school district does not construct a school on the land within 10 years from the date of purchase, the land must be offered for resale back to the subdivider or his successor in interest. (NRS 278.346) ~~(This bill removes the time restriction and the restriction that the land must be used only for a school site so that the requirement, as changed by this bill, now provides that the land must be offered for resale back to the subdivider or his successor in interest if the board of trustees determines at any time that the land is not required for a school or any other use by the school district.)~~

This bill provides that, in a county whose population is 100,000 or more but less than 400,000 (currently Washoe County), the school district and subdivider may negotiate a purchase price which is the lesser of: (1) the fair market value of the land on the date of purchase; or (2) the fair market value of the land at the time the tentative subdivision map was approved plus the costs of certain expenses paid by the subdivider. This bill also provides that, in such a county, if the purchase is not completed within 5 years after the final map that shows the school site is approved, the subdivider need not continue to set aside the land for the school district. This bill further requires a school district in such a county to offer the land back to the subdivider or successor in interest if construction on a school has not begun at the site within 10 years from the date of purchase.
