(NRS 414.060, 414.090) **Section 4** of this bill requires broadcasters in this State to work in cooperation with the Division of Emergency Management of the Department of Public Safety and the Nevada Broadcasters Association to develop comprehensive, coordinated plans for preparing for and responding appropriately to an emergency or disaster.

**Section 5** of this bill authorizes the Nevada Broadcasters Association, or its successor organization, the Nevada State Cable Telecommunications Association or its successor organization, any member of the Nevada State Cable Telecommunications Association or its successor organization and any other provider of emergency broadcasts, including, without limitation, a provider who uses emerging technologies. to establish a program for training and certifying first response broadcasters who, with certain restrictions, must be given access to an area affected by an emergency or disaster for the purpose of restoring, repairing or resupplying any facility or equipment critical to the ability of a broadcaster to acquire, produce and transmit essential emergency- or disaster-related public information programming. 26 public information programming in an area affected by an emergency or disaster. **Section 6** of  
27 this bill provides that, to the extent practicable and consistent with not endangering public  
28 safety, broadcasters and first response broadcasters must be given priority for the distribution  
29 of fuel, food, water and any other equipment, supplies or facilities over all persons other than  
30 persons who provide essential emergency services, health care and utility restoration services.
