Effect on the State: No.

EXPLANATION – Matter in *bolded italics* is new; matter between brackets ~~omitted material~~ is material to be omitted.

AN ACT relating to governmental financial administration; requiring the submission of annual reports by certain governmental entities relating to the persons awarded contracts for the design or construction of public works and the compilation of such reports by the Commission on Economic Development; requiring the capital improvement plan of a local government to include certain information regarding expenditures to maintain, renovate and replace capital assets; authorizing certain local governments to expend certain taxes ad valorem to maintain, renovate and replace governmental buildings; requiring the distribution of a portion of the taxes ad valorem levied in certain counties to the regional transportation commissions in those counties and authorizing the distribution to be pledged for bonds and other securities issued for payment of the cost of regional transportation projects; declaring the policy of the State to use private sector services on public works; providing for an interim study; and providing other matters properly relating thereto.

**Legislative Counsel's Digest:**

Local governments are required under existing law to submit an annual fiscal report to the Department of Taxation. (NRS 354.6015) **Section 6** of this bill requires a local government to include in that annual report the percentage of contracts for the design and construction of public works that were awarded during the reporting period to contractors and design professionals in this State. **Sections 14 and 16** of this bill impose identical reporting requirements on the State Public Works Board and the Department of Transportation with respect to contracts for public works of the State. **Section 2** of this bill requires the Commission on Economic Development to compile those reports and transmit the compilation to the Legislature, or the Interim Finance Committee, if the Legislature is not in regular session.

Under existing law, a local government is required to prepare annually a 6-year capital improvement plan. (NRS 354.5945) **Section 4.5** of this bill requires such a plan to include a separate listing of expenditures to maintain, renovate and replace capital assets, and a comparison of those expenditures to the amount of depreciation of those assets.

Existing law authorizes a county to levy a tax ad valorem for capital projects in the amount of 5 cents per \$100 of the assessed valuation of the county and, in a county whose population is 100,000 or more (currently Clark and Washoe Counties), requires the distribution of a portion of the proceeds of the tax among the county and the cities and towns within the county. (NRS 354.59815) **Section 5** of this bill authorizes each of those local governments that receives such a distribution to expend those tax receipts for projects to maintain, renovate and replace its buildings.

**Section 7** of this bill requires the distribution to the regional transportation commission created in each county whose population is 100,000 or more (currently Clark and Washoe Counties) of the portion of the property taxes levied for operating purposes by that county at the rate of 2 cents per \$100 of assessed valuation. **Section 15** of this bill authorizes this distribution to be used as pledged revenue for bonds and other securities issued by the county to pay the cost of regional transportation projects in the county.

Under existing law, if the estimated cost of a public work is \$100,000 or less, the State or a local government is authorized to award the contract to a contractor or perform the work with its own employees if certain requirements are met. (NRS 338.1386, 338.1442) Similarly, under existing law, if the estimated cost of a public work is less than \$35,000, the State or a political subdivision is authorized to prepare the maps, plans, specifications, reports and estimates for the public work itself. (NRS 625.530) The Department of Transportation is also authorized under existing law to perform limited work and improvements itself. (NRS 408.323) **Sections 8, 11, 17 and 18** of this bill add a legislative declaration to those provisions in existing law, stating that, whenever possible, it is in the best interest of the State for those services on public works to be performed by the private sector. **Section 19 of this bill directs the Legislative Commission to conduct an interim study concerning the extent to which contractors and workers who are employed on public projects and large private projects are from this State and provide recommendations for policies and other actions to increase the number of contractors and workers who are from this State.**
