S.B. No. 59—Increases the cumulative capacity of net metering systems operating within the service area of an electric utility. (BDR 58-408)

SENATE BILL NO. 59—COMMITTEE ON
COMMERCE, LABOR AND ENERGY

(ON BEHALF OF THE GOVERNOR)

PREFILED DECEMBER 15, 2010

Referred to Committee on Commerce, Labor and Energy

SUMMARY—Increases the cumulative capacity of net metering systems operating
~~[within the service area of an electric utility]~~ in this State.
(BDR 58-408)

FISCAL NOTE: Effect on Local Government: No.
Effect on the State: No.

~

EXPLANATION – Matter in ***bolded italics*** is new; matter between brackets ~~omitted material~~ is material to be omitted.

AN ACT relating to public utilities; increasing the cumulative capacity of net metering systems operating ~~[within the service area of an electric utility]~~ in this State; and providing other matters properly relating thereto.

Legislative Counsel's Digest:

Existing law requires a public utility that supplies electricity in this State to offer net metering to the customer-generators operating within the service area of the utility until the cumulative capacity of net metering systems operating within the service area exceeds 1 percent of the peak capacity of the utility. (NRS 704.773) This bill requires a public utility that supplies electricity in this State to offer net metering to the customer-generators operating within the service area of the utility until the cumulative capacity of net metering systems operating ~~[within the service area exceeds 5]~~ in this State equals 2 percent of the total peak capacity of ~~the utility~~ all utilities in this State.

THE PEOPLE OF THE STATE OF NEVADA, REPRESENTED IN
SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

Section 1. NRS 704.773 is hereby amended to read as follows:

704.773 1. A utility shall offer net metering, as set forth in NRS 704.775, to the customer-generators operating within its service area until the cumulative capacity of all ~~such~~ net metering systems operating in this State is equal to ~~plus~~ plus ~~2~~ percent of the ~~utility's~~ total peak ~~capacity~~ capacity of all utilities in this State.

2. If the net metering system of a customer-generator who accepts the offer of a utility for net metering has a capacity of not more than 100 kilowatts, the utility:

1 (a) Shall offer to make available to the customer-generator an energy meter
2 that is capable of registering the flow of electricity in two directions.

3 (b) May, at its own expense and with the written consent of the customer-
4 generator, install one or more additional meters to monitor the flow of electricity in
5 each direction.

6 (c) Shall not charge a customer-generator any fee or charge that would increase
7 the customer-generator's minimum monthly charge to an amount greater than that of
8 other customers of the utility in the same rate class as the customer-generator.

9 3. If the net metering system of a customer-generator who accepts the offer of
10 a utility for net metering has a capacity of more than 100 kilowatts, the utility:

11 (a) May require the customer-generator to install at its own cost:

12 (1) An energy meter that is capable of measuring generation output and
13 customer load; and

14 (2) Any upgrades to the system of the utility that are required to make the
15 net metering system compatible with the system of the utility.

16 (b) Except as otherwise provided in paragraph (c), may charge the customer-
17 generator any applicable fee or charge charged to other customers of the utility in
18 the same rate class as the customer-generator, including, without limitation,
19 customer demand and facility charges.

20 (c) Shall not charge the customer-generator any standby charge.

21 → At the time of installation or upgrade of any portion of a net metering system,
22 the utility must allow a customer-generator governed by this subsection to pay the
23 entire cost of the installation or upgrade of the portion of the net metering system.

24 4. The Commission shall adopt regulations prescribing the form and
25 substance for a net metering tariff and a standard net metering contract. The
26 regulations must include, without limitation:

27 (a) The particular provisions, limitations and responsibilities of a customer-
28 generator which must be included in a net metering tariff with regard to:

29 (1) Metering equipment;

30 (2) Net energy metering and billing; and

31 (3) Interconnection,

32 → based on the allowable size of the net metering system.

33 (b) The particular provisions, limitations and responsibilities of a customer-
34 generator and the utility which must be included in a standard net metering
35 contract.

36 (c) A timeline for processing applications and contracts for net metering
37 applicants.

38 (d) Any other provisions the Commission finds necessary to carry out the
39 provisions of NRS 704.766 to 704.775, inclusive.

40 **Sec. 2.** This act becomes effective on July 1, 2011.
