EXPLANATION – Matter in ***bolded italics*** is new; matter between brackets [omitted material] is material to be omitted.

AN ACT relating to energy; revising the prospective expiration of the Waterpower Energy Systems Demonstration Program; revising provisions governing net metering systems that use waterpower to generate electricity; and providing other matters properly relating thereto.

Legislative Counsel's Digest:

1 **Sections 1 and 3-5** of this bill extend the prospective expiration of the
2 Waterpower Energy Systems Demonstration Program.

3 Net metering measures the difference between the electricity supplied by a
4 utility to a customer-generator and the electricity generated by a renewable energy
5 system of the customer-generator which is fed back to the utility. Under existing
6 law, an electric utility is required to offer net metering to customer-generators until
7 the cumulative capacity of all net metering systems within the service area of the
8 utility is equal to 1 percent of the utility's peak capacity. Existing law also requires
9 that a net metering system be located on the premises of the customer-generator.
10 (NRS 704.771, 704.773) **Section 2** of this bill removes the requirement that a net
11 metering system be located on the premises of the customer-generator, if the system
12 uses waterpower as its primary source of energy to generate electricity intended
13 primarily to offset part or all of the customer-generator's requirements for
14 electricity on the property of the customer-generator on which the net metering
15 system is located or on contiguous property owned by the customer-generator.
