## CHAPTER.....

AN ACT relating to mammography; requiring a statement of the density of the patient's breasts and a notice prescribed by the State Board of Health regarding breast density to be included in a report provided to a patient; authorizing an administrative fine for failure to comply with such requirements; and providing other matters properly relating thereto.

### **Legislative Counsel's Digest:**

Under federal law, a facility that performs a mammogram must provide directly to each patient a summary report describing the results of the mammogram written in terms that are easily understood by a lay person. (42 U.S.C. § 263b) Existing state law imposes certain requirements on the operation of a machine used to perform mammography and further provides for the imposition of an administrative fine for operation in violation of those requirements. (NRS 457.182-457.187) This bill requires the owner, lessee or other person responsible for the radiation machine for mammography that was used to perform a mammogram to ensure that the summary report required by federal law includes a statement of the density of the patient's breasts and a notice prescribed by the State Board of Health that includes certain information relating to breast density, breast cancer and the impact of breast density on the effectiveness of mammography. In addition, this bill authorizes the Health Division of the Department of Health and Human Services to impose an administrative fine for failure to provide such notice. (NRS 457.187)
