Explanation

(Use Additional Sheets of Attachments, if required)

Section 2 requires the Department of Motor Vehicles to send monthly database reports to county clerks and the Secretary of State's office regarding driver authorization card applicants who do not provide documents to prove they are a U.S. citizen. Section 4 also requires monthly database reports to the Secretary of State regarding all applicants whose driver's license, identification card or driver authorization card has an expiration date other than the person's birthday. Both of these reports require programming to implement and include the person's name, mailing address and residential address. If additional information is required for a report, programming costs would likely increase.

This bill also requires the DMV to enter into an agreement with the Social Security Administration to verify the accuracy of information in an application to register to vote, which the Department is currently in compliance with. The process of verifying that an applicant's identity documents are valid is already in place, using the "Verification of Lawful Status" system established by the federal Department of Homeland Security.

The proposed implementation date of 7/1/2015 cannot be met due to the estimated programming hours needed to complete the requirements. However, the Department will be able to complete the programming in-house without additional funding.
