A.B. No. 209—Revises provisions governing the forfeiture of water rights.
(BDR 48-308)

ASSEMBLY BILL NO. 209—ASSEMBLYMAN OSCARSON

PREFILED FEBRUARY 13, 2017

Referred to Committee on Natural Resources,
Agriculture, and Mining

SUMMARY—Revises provisions governing the forfeiture of water rights.
(BDR 48-308)

FISCAL NOTE: Effect on Local Government: No.
Effect on the State: Yes.

~

EXPLANATION – Matter in ***bolded italics*** is new; matter between brackets **[omitted material]** is material to be omitted.

AN ACT relating to water; ~~requiring, under certain circumstances, the State Engineer to extend the time necessary to work a forfeiture of certain water rights;}~~ revising the criteria that the State Engineer must consider in determining whether to extend the time necessary to work a forfeiture; authorizing certain extensions to be for a period of not more than 3 years; and providing other matters properly relating thereto.

Legislative Counsel's Digest:

Existing law provides, with limited exception, that the holder of a water right forfeits the right if the holder fails for 5 successive years to use beneficially all or any part of the underground water for the purpose for which the right is acquired or claimed. Existing law authorizes the holder of a water right to request an extension to work the forfeiture and the State Engineer may grant an extension for good cause shown if the request is made before the expiration of the time necessary to work the forfeiture. Existing law also provides that a single extension must not exceed 1 year. (NRS 534.090)

This bill revises the criteria the State Engineer must consider to determine whether to grant or deny a request to extend the time necessary to work a forfeiture. This bill ~~requires, also authorizes~~ the State Engineer to extend the time necessary to work a forfeiture ~~if the request is made before the expiration of the time necessary to work the forfeiture and the water right authorizes the holder of the right to use groundwater~~ for a period of not more than 3 years in a basin: (1) where the withdrawals consistently exceed the perennial yield; or (2) that has been designated as a critical management area.

THE PEOPLE OF THE STATE OF NEVADA, REPRESENTED IN
SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

1 Section 1. NRS 534.090 is hereby amended to read as follows:
2 534.090 1. Except as otherwise provided in this section, failure for 5
3 successive years after April 15, 1967, on the part of the holder of any right, whether

it is an adjudicated right, an unadjudicated right or a right for which a certificate has been issued pursuant to NRS 533.425, and further whether the right is initiated after or before March 25, 1939, to use beneficially all or any part of the underground water for the purpose for which the right is acquired or claimed, works a forfeiture of both undetermined rights and determined rights to the use of that water to the extent of the nonuse. If the records of the State Engineer or any other documents specified by the State Engineer indicate at least 4 consecutive years, but less than 5 consecutive years, of nonuse of all or any part of a water right which is governed by this chapter, the State Engineer shall notify the owner of the water right, as determined in the records of the Office of the State Engineer, by registered or certified mail that the owner has 1 year after the date of the notice in which to use the water right beneficially and to provide proof of such use to the State Engineer or apply for relief pursuant to subsection 2 to avoid forfeiting the water right. If, after 1 year after the date of the notice, proof of resumption of beneficial use is not filed in the Office of the State Engineer, the State Engineer shall, unless the State Engineer has granted a request to extend the time necessary to work a forfeiture of the water right, declare the right forfeited within 30 days. Upon the forfeiture of a right to the use of groundwater, the water reverts to the public and is available for further appropriation, subject to existing rights. If, upon notice by registered or certified mail to the owner of record whose right has been declared forfeited, the owner of record fails to appeal the ruling in the manner provided for in NRS 533.450, and within the time provided for therein, the forfeiture becomes final. The failure to receive a notice pursuant to this subsection does not nullify the forfeiture or extend the time necessary to work the forfeiture of a water right.

2. ~~The Except as otherwise provided in subsection 3, the~~ State Engineer may, upon the request of the holder of any right described in subsection 1, extend the time necessary to work a forfeiture under that subsection if the request is made before the expiration of the time necessary to work a forfeiture. ~~If the~~ **Except as otherwise provided in subsection 3, the** State Engineer may grant, upon request and for good cause shown, any number of extensions, but a single extension must not exceed 1 year. ~~In~~ **Except as otherwise provided in subsection 3, in** determining whether to grant or deny a request, the State Engineer shall, among other reasons, consider:

(a) Whether the holder has shown good cause for the holder's failure to use all or any part of the water beneficially for the purpose for which the holder's right is acquired or claimed;

(b) The unavailability of water to put to a beneficial use which is beyond the control of the holder;

(c) Any economic conditions or natural disasters which made the holder unable to put the water to that use;

(d) ~~Any prolonged period in which precipitation in the basin where~~ **Whether** the water right is located ~~is~~ below the average for that basin or in which indexes that measure soil moisture show that a deficit in soil moisture has occurred in that basin; and in a basin within a county under a declaration of drought by the Governor, the United States Secretary of Agriculture or the President of the United States;

(e) ~~Whether a groundwater management plan has been approved for the basin pursuant to NRS 534.037; and~~

~~(f)~~ Whether the holder has demonstrated efficient ways of using the water for agricultural purposes, such as center-pivot irrigation ~~H:~~

(f) Whether the holder has demonstrated efforts to conserve water which have resulted in a reduction in water consumption; and

1 (g) Whether the water right is located in a basin that has been designated as
2 a critical management area by the State Engineer pursuant to subsection 7 of
3 NRS 534.110 or where withdrawals of groundwater consistently exceed the
4 perennial yield of the basin.

5 → The State Engineer shall notify, by registered or certified mail, the owner of the
6 water right, as determined in the records of the Office of the State Engineer, of
7 whether the State Engineer has granted or denied the holder's request for an
8 extension pursuant to this subsection. If the State Engineer grants an extension
9 pursuant to this subsection and, before the expiration of that extension, proof of
10 resumption of beneficial use or another request for an extension is not filed in the
11 Office of the State Engineer, the State Engineer shall declare the water right
12 forfeited within 30 days after the expiration of the extension granted pursuant to
13 this subsection.

14 3. ~~If the State Engineer shall, upon the request of the holder of any~~
15 ~~right described in subsection 1, extend the time necessary to work a forfeiture~~
16 ~~under that subsection if:~~

17 (a) ~~The request is made before the expiration of the time necessary to work a~~
18 ~~forfeiture; and~~

19 (b) ~~The right authorizes the holder to use underground water from a basin;~~

20 (i) ~~grants an extension pursuant to subsection 1 in a basin;~~

21 (a) Where withdrawals of groundwater consistently exceed the perennial
22 yield of the basin; or

23 (b) ~~That has been designated as a critical management area by the~~
24 ~~State Engineer pursuant to subsection 7 of NRS 534.110.~~

25 → ~~An extension must not exceed 3 years, but any number of~~
26 ~~extensions may be granted to the holder of such a right pursuant to this~~
27 ~~subsection. An extension that is granted pursuant to this subsection may exceed 1~~
28 ~~year.~~

29 4. If the failure to use the water pursuant to subsection 1 is because of the use
30 of center-pivot irrigation before July 1, 1983, and such use could result in a
31 forfeiture of a portion of a right, the State Engineer shall, by registered or certified
32 mail, send to the owner of record a notice of intent to declare a forfeiture. The
33 notice must provide that the owner has at least 1 year after the date of the notice to
34 use the water beneficially or apply for additional relief pursuant to subsection 2
35 before forfeiture of the owner's right is declared by the State Engineer.

36 5. A right to use underground water whether it is vested or otherwise
37 may be lost by abandonment. If the State Engineer, in investigating a groundwater
38 source, upon which there has been a prior right, for the purpose of acting upon an
39 application to appropriate water from the same source, is of the belief from his or
40 her examination that an abandonment has taken place, the State Engineer shall so
41 state in the ruling approving the application. If, upon notice by registered or
42 certified mail to the owner of record who had the prior right, the owner of record of
43 the prior right fails to appeal the ruling in the manner provided for in NRS 533.450,
44 and within the time provided for therein, the alleged abandonment declaration as set
45 forth by the State Engineer becomes final.

46 Sec. 2. This act becomes effective on July 1, 2017.
