Explanation

(Use Additional Sheets of Attachments, if required)

This bill would allow the Division of Health Care Financing and Policy to develop provider fee programs in collaboration with health care provider groups to improve both the quality and access to health care in Nevada. The fees collected would be matched with federal Medicaid funds and supplemental payment programs would be developed to distribute these funds to Medicaid health care provider group participants. At this time, the fiscal impact cannot be determined as this calculation would depend on the provider group. Since the Division will develop the fee in collaboration with each interested health care provider group, the resultant fee and state net benefit would depend on how each group structured their specific program.
