#### Explanation

(Use Additional Sheets of Attachments, if required)

BDR 43-806 allows a person who owns a vehicle that a non-repairable certificate has been issued to apply to the Department to have the vehicle deemed a salvage vehicle. The owner must submit an application and evidence satisfactory to the Department that the vehicle is not a non-repairable vehicle.

The computer application will be updated to add the brand of "non-repairable" and add printed text to all subsequent titles that the vehicle was previously deemed a non-repairable vehicle.

This BDR will also require procedural changes and a new form creation. The form will be available online for the user to print as needed.

Programming will be required to add functionality for processing the newly deemed salvage title. The cost for this programming will be absorbed by the DMV.

The effective date is January 1, 2018.
