

Assembly Bill No. 34–Committee on Natural Resources

CHAPTER.....

AN ACT relating to pest control; defining the term “control” as it applies to the control of noxious weeds by the owner or operator of land; authorizing the Director of the State Department of Agriculture to adopt regulations that establish and administer a program to certify certain agricultural products as being free from propagative parts from which noxious weeds may grow; authorizing certain notices to be delivered by electronic mail; exempting certain businesses that sell nursery stock only to the public exclusively via the Internet from certain licensure requirements; revising the prohibition against engaging in certain activities involving pest control without a license; revising provisions governing the certification of persons to apply or supervise the application of restricted-use pesticides; and providing other matters properly relating thereto.

Legislative Counsel’s Digest:

During the 2015 Legislative Session, Assembly Bill No. 77 replaced references to the cutting, eradication, removal or destruction of weeds with the term “control.” (Chapter 526, Statutes of Nevada 2015, at page 3588) **Section 1.5** of this bill defines “control” to mean the cutting, destruction or eradication of established noxious weed populations to prevent: (1) the spread, maturation and dispersal of any propagative part of the noxious weed; and (2) the reproduction and spread of such noxious weeds.

Existing law authorizes the Director of the State Department of Agriculture to, by regulation, establish and administer a program to certify agricultural products as being free from noxious weeds to: (1) support the control and prevention of the spread of noxious weeds in this State; and (2) allow businesses in this State to market such agricultural products as being in compliance with any applicable federal law or regulation or any other requirement specified by the Director. (NRS 555.010) **Sections 1.5 and 2** of this bill expand the program by authorizing the Director to adopt such regulations to certify agricultural products as being free from any propagative parts from which a noxious weed may grow. **Section 2** additionally expands the purposes of the program to include allowing businesses in this State to market agricultural products as being in compliance with the guidelines set forth by the North American Invasive Species Management Association, in addition to applicable federal law or regulation or any other requirement specified by the Director.

Existing law authorizes the Department to provide a written notice of its finding that an area is infested with certain pests, noxious weeds or plant diseases to the owner or occupant of the area. (NRS 555.100) Existing law also authorizes the State Quarantine Officer to serve notice on the owner or occupant of land where noxious weeds are found. (NRS 555.160) **Sections 3 and 4** of this bill authorize such notices to be served by electronic mail.

Existing law requires a person who is a dealer of nursery stock to obtain a license from the Director to engage in such business. Existing law exempts a business that is licensed by another state that sells nursery stock only to the public

exclusively by catalog from the licensing requirement. (NRS 555.236) **Section 5** of this bill expands this exemption to a business that is licensed by another state that sells nursery stock only to the public exclusively via the Internet.

Existing law prohibits a natural person from engaging in pest control or serving as an agent, operator, pilot, primary principal, location principal or principal for pest control within this State at any time without a license as an applicator issued by the Director. (NRS 555.280) **Section 15** of this bill applies this prohibition only to such activities engaged in for hire or for profit without a license. **Section 15** additionally prohibits a natural person or business entity from operating as a pest control business for hire or for profit within this State at any time without a business license issued by the Director.

Section 25 of this bill eliminates provisions of existing law providing for the certification of a governmental agency to engage in pest control and the licensure of an employee of such an agency to engage in pest control in the course and scope of his or her employment. (NRS 555.2642, 555.2643, 555.2688, 555.2771-555.2775) **Sections 6-8, 14 and 16-19** of this bill instead provide for the certification of employees of a government agency who engage in pest control as non-private applicators in the same manner as other applicators of pesticides are certified.

Sections 1, 9, 11, 13, 20, 22 and 23 of this bill replace references to "certified applicators," who are authorized to apply or supervise the application of restricted-use pesticides, with references to "authorized commercial applicators," "certified non-private applicators," and "private applicators," which are the categories of persons authorized to apply or supervise the application of such pesticides. **Section 5.5** of this bill makes a conforming change to indicate the proper placement of **Section 1** of this bill in the Nevada Revised Statutes.

Section 12 of this bill provides that a restricted-use pesticide is a certain type of pesticide that has been classified for restricted use in accordance with the Federal Insecticide, Fungicide, and Rodenticide Act.

Section 18 of this bill authorizes the Director to investigate any loss or damage resulting from the application of any pesticide by a commercial applicator or authorized commercial applicator.

Section 19 of this bill authorizes the Director to take disciplinary action against a person licensed to engage in pest control who fails to provide adequate instruction or supervision to an unlicensed applicator working under the licensee's supervision.

Section 20 of this bill provides that a person licensed as a commercial applicator and authorized to engage in pest control is authorized to use or supervise the use of restricted-use pesticides without obtaining a certificate if the licensee complies with certain requirements.

Section 21 of this bill requires an applicant for a certificate to use a restricted-use pesticide to demonstrate that he or she satisfies the standards set forth in applicable federal regulations if the applicant is applying to be certified as a non-private applicator or private applicator.
