AN ACT relating to pesticides; revising requirements relating to the maintenance of certain records of restricted-use pesticides; and providing other matters properly relating thereto.

**Legislative Counsel's Digest:**

The United States Environmental Protection Agency delegates the primary responsibility of implementing the Certification of Pesticide Applicators Rules to states through State certification plans. (7 U.S.C. § 136i) Existing federal regulations impose certain recordkeeping requirements on restricted-use pesticide dealers. (40 C.F.R. § 171.303) The Nevada Pesticides Act requires registered sellers of restricted-use pesticides to maintain records of all sales for 2 years and to submit a monthly report to the Director of the State Department of Agriculture specifying the restricted-use pesticides sold during the previous month. (NRS 586.406) Restricted-use pesticides are defined in existing law as any pesticides that: (1) the Director of the State Department of Agriculture has determined to be injurious or detrimental to certain animals, crops, land or public health and safety; or (2) have been classified for restricted use by or under the supervision of a certified applicator in accordance with federal law. (NRS 586.205) This bill requires registered sellers to maintain records for 2 years of each distribution of restricted-use pesticides, in addition to the sales, and revises the requirements for monthly reports of sales to the Director to also include distributions of restricted-use pesticides. Additionally, this bill requires that the records of sales and distributions be made in accordance with the federal recordkeeping requirements for State certification plans.
