I oppose this bill as written and request amendments be made.

Please add amendments that:

- Remove all vaccine administration - sections 15-19 entirely
- Delete verbal consent and require written consent - section 10 (d)
- Remove potentially required dental screenings for school and daycare admittance - sections 26-28 entirely

Thank you

Joni Hammond

Sparks, NV

I OPPOSE BILL AB147

This bill was rejected before and for good reasons! The financial interests pushing this bill should be stopped. It needs to be rejected or at least amended as it has multiple very disturbing aspects:

- **First:** It opens the door for further deterioration of health care in Nevada by lowering standards of care: it will authorize dentist, dental hygienists and dental assistants to do the job of a medical doctor without proper training or knowing the full medical history of a patient - and to administer vaccines. Nevada suffers no shortage of vaccine administering medical facilities and this section of the bill is a waste of taxpayer dollars. It is obvious it serves external financial interest looking to change the law so they can make more money. It contributes nothing to the welfare of the community.

-Second: Schools and childcare facilities should have nothing to do with this bill - additional dental exam requirement for attending childcare or school adds an undue burden to already disadvantaged families, by adding extra financial burden, stress and time for parents already stretched to their limits. This section legitimizes this requirement and opens the door to further barriers to entry to schools.

-Tele dentistry needs to be very tightly regulated. It is such a slippery slope to medical mistakes and malpractice - a huge disservice to patients. This bill legitimizes the overuse of tele dentistry - easy money for dentist and worse care for patients. Nevada should not issue tele dentistry licenses at all.

Anelia Mollova,
Resident of Clark County, Nevada

Dear Commerce & Labor Committee:

03/11/23

AB147 – relating to dentistry

Please amend AB147 as follows:

10(d) remove “verbal” and require informed written consent from patient.

Delete Sections 15 – 19: Immunizations do not belong in a dentist office. Immunizations should only be performed by a licensed physician or pharmacist.

Delete Sections 26-28: No to any mention of Nevada law to potentially “require” dental screenings in order for kids to be admitted to school or daycare.

Verbal consent, dentists giving immunizations and potential dental screenings for kids to be admitted to school or daycare is unacceptable requirements in this bill. Please consider amending AB147 per above.

Thank You,

*Ann Sweder
Sparks,Nv. 89441*

Dear Assembly Commerce & Labor Committee Members,

I am asking you to please consider these Amendments to the AB147 Bill:

- **Remove all vaccine administration-sections 15-19 entirely**
- **Delete verbal consent and require written consent -section 10 (d)**
- **Remove potentially required dental screenings for school and daycare admittance - sections - sections 26-28 entirely.**

As a mother of 4, a very hard working teacher, and a health advocate who promotes a healthy choice diet, daily physical activity, and clean living, I hold a strong stance on this! Adding unnecessary vaccines into our children's bodies is not lawful, nor have they been proven to be necessary or beneficial at all.

So I am asking you to please listen to those who are asking you to say:

- **NO to Dentists and Dental Hygienists giving vaccines**
- **NO to verbal patient consent written only**
- **NO to any mention in Nevada law of potentially "required" dental screenings for children as a condition of admittance to school or daycare.**

Please do your research, we are talking about human lives in America, isn't that why you are called to be in your positions, to listen to and help your people, just as I am called to be a caring and helpful parent and a teacher? I believe our country can move past all of this and get back to what really matters: Following our Constitution, teaching our children to have strong values, and caring for, loving, and helping one another.

This is not about taking sides, it is about our children and doing what is right. As a teacher, I taught through the pandemic, I was not afraid, nor have my own children been afraid who are ER/ICU nurses and a Firefighter/Paramedic! We are called to help others and to do what is ethically right for all people.

***Please do your part to fight this bad bill for
Health Freedom in Nevada**

Very Respectfully,

Mrs. Carole Romanowitz

This bill is BAD for Nevada.

1. Teledentistry and orthodontia? Dentists prescribing and diagnosing without actually seeing the teeth? This makes zero logical sense. Will dentists and dental hygienists be giving televaccinations as well?
2. Without written consent there is ZERO trail of who actually consented and who did not. Since anesthesia may be used for certain dental procedures, this sets up a patient for “unconsented vaccinations” while under anesthesia. Consent to medical procedures should always be in writing.
3. The Legislature has NO business requiring dental checks as a requirement for entrance for public education. The one mandate of public education is to teach children to read, write and perform arithmetic (which Nevada as a state has been failing miserably). The public schools are not part of the Child Protective Services. Parents are the guardians of children and their dental care, not schools.
4. Perhaps the Legislature should concern itself with education within the State of Nevada and the high per capita spending on education that is producing children that are functionally illiterate as it is unlikely Nevada failing to educate the children is due to a lack of dental hygiene.

PLEASE VOTE "NO" on AB147

Americans are sick and tired of the mandates, lies, and propaganda that is being forced on us. You have "canceled" the truth and shut the mouths of real qualified medical professionals that have actually done the studies that reveal the truth about the jab. First, it doesn't work. Look how many vaxed people got the virus!!! Secondly, look at the government's VAERS website showing the thousands and thousands of adverse effects from the Big Pharma money-making vaccines. And look how many young, healthy (mostly male) athletes who are dropping dead because of this horrible vaccine that is being forced on all of us. Haven't our children suffered enough from the mandates and useless decisions that have hampered their education. Leave our own health decisions up to us as individuals. You are ruining our cities, states, and country. Stop this socialist-type of nonsense.

Hello,

I oppose AB147 bill as written on the revised provisions relating to dentistry as stated below.

I OPPOSE AND I VOTE NO to Dentist and Dental Hygienists giving vaccines.
I OPPOSE AND VOTE NO to Verbal or Written Patient Consent
I OPPOSE AND VOTE NO to Any Mention in Nevada Law or Revising Nevada Law to Required dental screenings for children as a condition of admittance to school or daycare, etc.

I submit AB147 Amendments to be Proposed and Considered

***REMOVE** Sections 15-19 Vaccine Administration

***DELETE** Section 10 (d) Verbal Consent and Require Written Consent

***REMOVE** Sections 26-28 - Required Dental Screenings for School and Daycare Admittance

***INSERT "and"** to Section 7.4 (c):

7.4. A licensee shall not:

(c) Engage in activity that is outside his or her scope of practice while providing services **and** through tele-dentistry.

Ladies and Gentlemen:

Several key issues in making this a BAD bill! *Under no circumstances should Dentists and Dental Hygienists provide ANY vaccine. *All patient consent must be written. An absolute NO of any Nevada law requiring a dental screening for children in condition to attend school or daycare.
If to amend; there must be a removal of all administration. Section 15-19 in its entirety. Delete verbal and provide ONLY written consent. Section 10(d)
Scratch all dental screenings. Sections 26-28.

Respectfully,
B. Foster

NEVADA LEGISLATURE:

I am submitting this written statement of opposition to you as a 30 year resident of Las Vegas, Nevada, a parent of two, a business owner, and political activist....

I am opposed to AB147!

NO dentist or dental hygienist should be able to give a vaccine - they are NOT qualified to do so nor are they qualified to render medical aid to those who may pass out, have seizures or any other medical event after receiving such a vaccine (covid vax) as we have seen literally hundreds of times in the past.

Verbal consent is not sufficient! WRITTEN CONSENT should be required for vaccines. This is common sense!

NO required dental screenings for children as a condition of going to school. Do you know how many families you will be impacting financially? Government needs to be LESS involved in people's health - not more! This is invasive and intrusive.

AMENDMENTS REQUESTED!!!

1. REMOVE all vaccine administration sections 15-19 entirely!!
2. Written consent to treatment - Section 10 (d).
3. REMOVE potentially required dental screenings for school and daycare admittance - Sections 26-28 entirely!

Thank you for your service and thank you for including these amendments to protect Nevada's children and families!!

Kindest Regards

Hello- please add the filling for public record...

My name is Mary Lim and I am extremely concerned about revised provisions surrounding AB147.

Please vote NO to dentists and dental hygienists administering vaccines; these professions do not know vaccine ingredients, side effects, nor have the means to handle emergencies for patients who might suffer immediate adverse reactions, such as anaphylaxis or seizure.

Please vote NO to verbal patient consent; common sense would suggest informed and written consent only, for liability and accountability factors.

Please vote NO to possible required dental screenings for children as a condition to attend school or daycare; dental concerns are not a public health safety issue.

I further request you consider these amendments:

- Remove all vaccine administration, sections 15-19 entirely,
- Written consent to treatment (section 10 (d),
- Remove potentially required dental screenings for school and daycare admittance, sections 26-28 entirely.

Respectfully,
Mary Lim

Hello, my name is Rachel Puaina and as a mother of four and a public school teacher I am imploring that you speak up against AB147. This bill could discriminate against families who do not wish to be vaccinated. As we know, many underprivileged families and underrepresented populations do not have access or they do not wish to be vaccinated for health, income, religious, or other reasons. This bill would also remove written consent that not only puts patients in danger, but it will put medical professionals in legal trouble. As a representative, please stand up for those of us who advocate on behalf of our children, our families and our community to have equal rights and access to services by voting no on AB 147. Thank you, Rachel Puaina

Hello, I am writing regarding proposed changes for vaccine administration by dental professionals and mandated dental screenings for kids to enter school. These are unacceptable changes and I ask you to please remove them. Dental professionals are not doctors or nurses and should not be administering vaccines. Period. We do not need more required actions for parents to be able to put their kids in school. Keep the red tape and stop making more hurdles for parents to jump.

- **NO to Dentists and Dental Hygienists giving vaccines**
- **NO to verbal patient consent-written consent only**
- **NO to potentially “required” dental screenings for children as a condition of admittance to school or daycare**

Please amend to:

- **Remove all vaccine administration – sections 15-19 entirely**
- **Written consent to treatment – section 10 (d)**
- **Remove potentially required dental screenings for school and daycare admittance – sections 26-28 entirely**

Thanks!

Dear Secretary for Public Comment Cindi Latour

I'm writing to you today to ask you to amend AB147 or vote against it.

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

Regards,
Martha Miners

Dear Secretary for Public Comment Cindi Latour

I'm writing to you today to ask you to amend AB147 or vote against it.

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing.

You can improve the bill by making these changes:

Dear Secretary for Public Comment Cindi Latour

I'm writing to you today to ask you to amend AB147 or vote against it.

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

Regards,
Tina Benbough

Dear Secretary for Public Comment Cindi Latour

I'm writing to you today to ask you to amend AB147 or vote against it.

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

Regards,
Kindra Reif

[Learn why this is important](#)

Dear Secretary for Public Comment Cindi Latour

I'm writing to strongly urge you to amend AB147 or vote against it. As written, it authorizes people lacking specific safety training to administer vaccines, thereby putting vaccine recipients at risk. It also weakens legal protection by removing written consent.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Below are specific health risks that are ignored given the way the bill is written now.

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing.

Thank you for your consideration.

Regards,
Rosemary Woodrow

I'm writing to you today to ask you to amend AB147 or vote against it.

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

Regards,
Douglas Couch

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

Regards,
Daniel Fendell

And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

Regards,
Adrienne Weintz

Dear Secretary for Public Comment Cindi Latour

I'm writing to you today to ask you to amend AB147 or vote against it.

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

[Learn why this is important](#)

Dear Secretary for Public Comment Cindi Latour

I'm writing to you today to ask you to vote against AB147.

This bill would allow dentists and dental hygienists to give vaccines despite not having any training on how to give them, with no knowledge or experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. Dentists typically do not have after-hours on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

AB147 also makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It is bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you would be doing.

In my opinion there is no language that can improve the bill, so I am asking you to please vote against it.

Thank you for your consideration.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

Dear Secretary for Public Comment Cindi Latour

I'm writing to you today to ask you to amend AB147 or vote against it.

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

And dentists typically do not have after-hours, on-call availability in the event of a problem.

What is up with this? What in the heck do your teeth have to do with school admittance? Why do dentists even come close to receiving this authority? Are we just overreaching for the sake of seeing what we can get away with? Does this only seem silly to me??

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

Dear Secretary for Public Comment Cindi Latour

I'm writing to you today to ask you to amend AB147 or vote against it.

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

Regards,
Raissa Pilon

Dear Secretary for Public Comment Cindi Latour

I'm writing to you today to ask you to vote against AB147.

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

Regards,
Barbara Coles

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

Regards,
Pamela Warden

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

Regards,
Deborah Flood

Dear Secretary for Public Comment Cindi Latour

I'm writing to you today to ask you to amend AB147 or vote against it.
STOP THE LYING AND DANGEROUS VAX NONSENSE!!

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

Dear Secretary for Public Comment Cindi Latour

I'm writing to you today to ask you to amend AB147 or vote against it.

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

Dear Secretary for Public Comment Cindi Latour

I'm writing to you today to ask you to amend AB147 or vote against it. This bill is truly dangerous and would endanger innocent lives just to push a hidden vaccine agenda.

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. Also dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than written consent. This opens the door for misunderstanding and removes the dual protection of a written record in legal disputes.

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing and signaling a return to a totalitarian environment!

Please improve the bill by potentially making these changes:
Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent; instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration. Please be vigilant in your duty toward protecting Nevadans from unnecessary and unpopular laws such as this one.

Dear Secretary for Public Comment Cindi Latour

I'm writing to you today to ask you to amend AB147 or vote against it.

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

Regards,
Lisa pantoja

Dear Secretary for Public Comment Cindi Latour

I'm writing to you today to ask you to amend AB147 or vote against it.

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

Regards,
Janet Oglesby

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

Regards,
Gabrielle Casey

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

Regards,
Marnee Foldoe

Dear Secretary for Public Comment Cindi Latour

I'm writing to you today to ask you to amend AB147 or vote against it.

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

[Learn why this is important](#)

Dear Secretary for Public Comment Cindi Latour

I'm writing to you today to ask you to amend AB147 or vote against it.

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

Dear Secretary for Public Comment Cindi Latour

I'm writing to you today to ask you to amend AB147 or vote against it.

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

Regards,
Maria Franco

Dear Secretary for Public Comment Cindi Latour

Would you allow your child to be operated on by someone who lacks the necessary qualifications? Of course not! Then why would you allow other children to go that route?

I'm writing to you today to ask you to amend AB147 or vote against it.

Please dont allow dentists and dental hygienists to give vaccines. Also, please don't allow 16 year olds to drive 18-wheelers!

Verbal consent for vaccines? This is designed to remove the liability, because then it becomes a "he said, she said" issue when something goes wrong, and I assure you, something will go wrong.

Now, I'm all in for good dental hygiene. But this bill sets up a possibility of requiring dental records for school attendance. Please, think!

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

Dear Secretary for Public Comment Cindi Latour

I'm writing to you today to ask you to amend AB147 or vote against it.

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your consideration.

Regards,
April Summers

It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing.

Please do not vote to allow persons who have not studied the numerous real adverse events possible with vaccines to administer them. Please do not replace the patient's *medical* doctor. This also opens a wide door for lawsuits against dental professionals.

And dentists typically do not have after-hours, on-call availability in the event of a problem.

I know first hand from my own personal dental hygienist, that the whole staff in the office just watched a little video on how to administer the "vaccines". Absolutely NO prior training other than that video. Completely unacceptable on every level.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. Dear Secretary for Public Comment Cindi Latour

I'm writing to you today to ask you to amend AB147 or vote against it.

Dental care should NOT be required for any citizen of Nevada. What would be next? Required hair cuts? Required diets? Required exercise?

Nor should dental hygienists be granted special duty to administer vaccines. What's next? Firefighters, case workers, teachers, beauticians?

There should be no special privileges to private industries (the dental industry in this case) to force citizens of Nevada to receive services or products they do not wish to have.

Verbal consent for vaccines is unacceptable for citizens of Nevada. Proposing verbal consent only, rather than written consent, could be very dangerous for the citizens of NV and their God given rights, protected by the constitution.

This bill is unacceptable to the welfare of the citizens of NV.

I urge you to vote NO on AB147.

Thank you for your consideration.

Regards,
Michele McFie

[. Learn why this is important](#)

Dear Secretary for Public Comment Cindi Latour

I'm reaching out to you today to ask you to please amend AB147 or vote against it.

This bill would allow dentists and dental hygienists to give vaccines despite not having training on how to give them, knowledge and experience of contraindications, what to advise patients and parents to watch for post-vaccination, and how to report adverse reactions to the Vaccine Adverse Events Reporting System. And dentists typically do not have after-hours, on-call availability in the event of a problem.

The bill would also allow patients to give verbal consent rather than the gold standard of written consent. This opens the door for miscommunication or misunderstandings and also removes the dual protection of a written record in legal disputes.

AB147 makes mention of requiring dental screenings for children as a condition of admittance to school or daycare. While the bill does not force this requirement now, it sets up the framework for a future mandate. It's bad public policy to deny an education to a child because of their medical status, including their dental status. By including this language, that's exactly what you'd be doing. Keeping in mind that many people do not have access to decent dental coverage, or any at all. This puts already vulnerable groups in more trouble.

You can improve the bill by making these changes:

Remove all vaccine administration authority for dental professionals (delete sections 15-19 of the bill).

Delete references to verbal consent and instead require the gold standard of written consent (section 10(d) of the bill).

Remove all references to requiring dental screenings for school and day care admittance (sections 26-28).

Thank you for your time on this.

Regards,
Martselina Phillips
