Explanation (Use Additional Sheets of Attachments, if required)

BDR 43-108 (AB 93) revises provisions relating to traffic enforcement and proposes to allow local authorities to install and use traffic camera devices to enforce school zone and school crossing speed limits and prohibiting u-turns and vehicle passing in those zones. It will also require a peace officer to review evidence of violations and issue civil infraction citations. Further, it provides a presumption that the registered owner of the vehicle is the driver at the time of the violation, rebuttable under certain circumstances, provides that the violation detected by the device is not a moving traffic violation, and makes changes to exclude these violations from the assessment of demerit points. The bill becomes effective upon passage and approval for adopting any regulations and performing other preparatory administrative tasks, and on January 1, 2024 for all other purposes.

The Department has reviewed this bill and determined there will be no impact as currently written. DMV currently coordinates with law enforcement for the purposes of determining the addresses of registered owners. Further, non-moving violations are not reported to DMV for demerit purposes, so no violation codes changes are anticipated. Changes to DMV's Driver's Handbook noting the use of traffic cameras in school zone areas will be combined with standard ordering protocols.

Name Angela Smith-Lamb

Title DMV Administrator

GOVERNOR'S OFFICE OF FINANCE COMMENTS

Date Thursday, February 09, 2023

The agency's response appears reasonable.

Name Amy Stephenson

Title Director
