Conservation Bond Program Project List

Conserve Nevada Bond Program Current Projects				
Location (County)	Project Title	Project Description	Bond Award/Budget Amount	Bond Expenditures to Date
Nevada Division of State Parks (Sec. 2(1))				
White Pine County	Cave Creek Dam Restoration	This project provides partial funding to stabilize and reconstruct Cave Creek Dam at Cave Lake State Park. Cave Creek Dam is owned by the Nevada Department of Wildlife (NDOW). The 32-acre reservoir supports fishing, boating, swimming, hiking, camping, and various other outdoor recreation activities in White Pine County. The dam's replacement is a partnership between NDSP, NDOW, and State Public Works and will restore outdoor recreation and fishery activities at the lake.	\$ 1,600,000.00	\$ 1,600,000.00
Lincoln County	Echo Canyon Dam Emergency Response	Project will provide for emergency response to flooding and flood damage at Echo Canyon Reservoir and State Park. This includes repairs to the road system, utilities at the park, and will provide resources for the initial repair of Echo Canyon Dam.	\$ 17,580.65	\$ 17,580.65
White Pine County	Elgin Schoolhouse Land Acquisition	Several generations of children were educated in this one-room school, which covered grades one through eight from 1922 through 1967. This project would seek to expand this site to include trail facilities for outdoor recreation and expanded experience of this site. This project would acquire APN 008-111-03 totaling 0.96 acres for the construction of a day-use area and trail amenities for expanded use and outdoor recreation opportunities at Elgin Schoolhouse State Historic Site. This project leveraged \$218,290.43 from other sources.	\$ 12,709.57	\$ 12,709.57
Clark County	Ice Age Fossils State Park Phase 2	This funding is being matched with \$3,500,000 from the Helmsley Charitable Trust. This funding is being utilized for the design and development of park trails and trail amenities, construction of boardwalks, interpretative displays, picnic pavilions, overlooks, shaded seating areas, and landscape around the visitor center and trailheads. Ice Age Fossils State Park is a 315-acre park that features a portion of the upper Las Vegas Wash that is rich in paleontological and historical resources. During the Pleistocene this park was home to species like the Columbian mammoth, American lion, camelops, ancient llamas, dire wolves, and ground sloths. Abundant fossils were discovered on this site as part of the "Big Dig" in 1962-1963.	\$ 2,017,845.57	\$ 2,017,845.57
Clark County	Valley of Fire Visitors Center Design/Engineering	This project is the first phase to design and construct a new visitor center at Valley of Fire State Park. This design would address increased visitation, the park's natural resource scarcity, public safety, and would provide a new interpretive center to educate and welcome a new generation of visitors and Nevadans alike to Valley of Fire State Park.	\$ 1,085,540.00	\$ 1,085,540.00
Clark County	Valley of Fire Visitors Center Construction	NDSP has expended \$823,130.30 of the \$7,000,000 obligated towards the construction of the Valley of Fire Visitors Center (FY2024: \$26,217.10, FY2025 (TD): \$796,913.20). This funding is being matched with \$7,000,000 from the Helmsley Charitable Trust. Groundbreaking for this project was on April 22, 2024.	\$ 7,000,000.00	\$ 823,130.00
Lyon County	Walker River State Recreation Area Nine Mile House Stabilization	This project would stabilize the Nine Mile House at Nine Mile Ranch within the Walker Lake State Recreation Area. The Nine Mile House was damaged by an earthquake in December of 2016. This historic structure was built around 1860 and served as a stage stop between Aurora/Bodie and Carson City.	\$ 1,000,000.00	\$ -

Conservation Bond Program Project List

Conserve Nevada Bond Program Current Projects				
Location (County)	Project Title	Project Description	Bond Award/Budget Amount	Bond Expenditures to Date
White Pine County	Monte Neva Acquisition	This acquisition would acquire 240 acres in White Pine County (APN 008-480-03). This would include both the acquisition of surface water and ground water rights for habitat protection and outdoor recreation development. This site would be combined with our adjacent acquisition. This would combine this 240-acre acquisition with a previously completed acquisition of 160 acres recently purchased by the State of Nevada (APN 008-480-18, 19, 17, 16).	\$ 700,000.00	\$ -
Lincoln County	Kershaw-Ryan Acquisition	This acquisition would acquire approximately 74.92 acres in Lincoln County (APN 003-210-04 & 003-220-003). This property is adjacent to Kershaw Ryan and would be utilized to expand the park.	\$ 700,000.00	\$ -
Douglas County	Stephen A. Kinsey Acquisition	This acquisition would acquire 1.36 acres and a historic residence in Douglas County (APN 1319-07-710-003). The Kinsey House which is adjacent to Mormon Station State Historic Park was built in 1855-1856 and was one of the earliest land claims in Nevada. Stephen A. Kinsey arrived in Genoa in 1851 with Col. John Reese. Kinsey served as a clerk of the probate court and ex-officio recorder of Carson County and later became the clerk of Douglas County. In his role Kinsey helped preserve Nevada's earliest land records and claims. He was later appointed by Gov. Nye as one of the first county commissioners of Douglas County.	\$ 700,000.00	\$ -
Lincoln County	Cathedral Gorge Ranger Residence	This acquisition would acquire approximately 3-acres and a residence in Lincoln County (APN 012-110-20). This residence would be utilized to provide Park Ranger housing for the park. The property lies at the entrance to Cathedral Gorge State Park.	\$ 350,000.00	\$ -
Subtotal			\$ 15,183,675.79	\$ 5,556,805.79

Nevada Department of Wildlife (Sec. 2(2))				
White Pine County	Cave Creek Dam Restoration	This project provides partial funding to stabilize and reconstruct Cave Creek Dam at Cave Lake State Park. Cave Creek Dam is owned by the Nevada Department of Wildlife (NDOW). The 32-acre reservoir supports fishing, boating, swimming, hiking, camping, and various other outdoor recreation activities in White Pine County. The dam's replacement is a partnership between NDSP, NDOW, and State Public Works and will restore outdoor recreation and fishery activities at the lake.	\$ 4,005,147.39	\$ 4,005,147.39
Lyon County	Desert Creek Ranch Conservation Easement	This project leveraged \$8,885,417 in partner match funding. The project conserves an essential piece of private land for long-term conservation of the Bi-State sage-grouse distinct population segment and other wildlife species of Western Nevada. The Desert Creek Ranch is composed of 1,228 acres of irrigated pasture, meadow and riparian systems that provide significant breeding and brood rearing habitat for the Bi-state sage grouse. A lek is located on the property.	\$ 50,000.00	\$ 50,000.00

Conservation Bond Program Project List

Conserve Nevada Bond Program Current Projects				
Location (County)	Project Title	Project Description	Bond Award/Budget Amount	Bond Expenditures to Date
Lincoln County	Mathews Drop Structure Enhancement	The Mathews drop structure was constructed by the Civilian Conservation Corp in 1937. The Mathews drop structure prevents a 16-20ft head cut from moving upstream in the Meadow Valley Wash. This structure prevents the headcut from impacting riparian habitat, wetlands, and livestock pastures in the Panaca Valley. This structure has helped to prevent sedimentation that could impact the federally endangered southwestern willow flycatcher (<i>Empidonax traillii extimus</i>) in the Rainbow Canyon. In addition to impact from sedimentation the structure helps to prevent this headcut eroding critical habitat for the Ute ladies'-tresses orchid (<i>Spiranthes diluvialis</i>). The Panaca Valley is the only known location where this federally threatened species is known to exist in Nevada. This project would provide maintenance and repairs to Mathews Drop structure that has been severely impacted by floods from 2005-2010. This project would ensure the stability of this structure and continue to benefit Lincoln County and surrounding habitat. This project is in partnership with the Lincoln County Conservation District at leveraged \$61,400 from partners.	\$ 20,000.00	\$ 20,000.00
Douglas County	Zephyr Cove Public Safety Pier Planning	Lake Tahoe receives over 15 million visitors per year. With the growth of activities on the lake and increased demand for public safety and services there has been a growing need for strategically located public safety piers on the Eastern Shore of Lake Tahoe. This project leveraged \$75,000 in partner funding to provide engineering and feasibility review of a proposed site for a joint public safety pier along the Southern portion of the Eastern shore of Lake Tahoe. The construction of the public safety pier would be a partnership between Douglas County Sheriff's Office, Douglas County Fire Rescue, NDOW, Tahoe Regional Planning Agency, and potential federal partners.	\$ 28,000.00	\$ 28,000.00
White Pine County	Schell-Egan Steptoe Valley WMA Land & Water Acquisition	This project supported the conservation of 4,602 acres of land and water rights in the Schell Creek Range, Egan Range, and Steptoe Valley area of White Pine County. This acquisition comprised of dispersed parcels that contain wet-meadow and upland habitat that supports numerous species. Species protected by this acquisition include migratory birds, elk, mule deer, blue grouse, and pronghorn antelope. Parts of this acquisition will expand the Steptoe Valley Wildlife Management Area. This project leveraged \$4,757,000 in partner funding.	\$ 50,000.00	\$ 50,000.00
Elko County	Gallagher Hatchery Inlet Repair	The Gallagher Fish Hatchery is located on the east slope of the Ruby Mountains in Ruby Valley. Originally built in 1940. The hatchery supports fish rearing and stocking programs in Nevada. The site is fed via two natural springs that support hatchery operations. This project would provide for the replacement of a pump motor on the inlet of Hagar Spring to allow continued rearing operations.	\$ 19,342.90	\$ 19,342.90
Lyon County	Mason Valley Hatchery Cooling Tower Replacement	Mason Valley Fish Hatchery is located within the Mason Valley Wildlife Management Area North of Yerington. This project would replace a cooling tower fan that has failed. This will ensure cooling, aeration, and temperature control for trout rearing.	\$ 18,235.00	\$ 18,235.00

Attachment A

Conservation Bond Program Project List

Conserve Nevada Bond Program Current Projects				
Location (County)	Project Title	Project Description	Bond Award/Budget Amount	Bond Expenditures to Date
Elko County	Pole Canyon Conservation Easement	The project would purchase a conservation easement composed of 12,122 acres in the East Humboldt Range. This would conserve habitat along a critical migratory corridor for the largest population of mule deer in Nevada, as well as bighorn sheep, mountain goat and several species of conservation priority, including the greater sage-grouse. In addition to this purchase the project would provide a public access easement on 4,700 acres of the property. This includes limited motorized access into the Humboldt National Forest and access for hiking, biking, cross country skiing, snowshoeing, or other low impact and nonmotorized methods. This project leveraged \$1,136,024 in match from partners.	\$ 245,000.00	\$ 245,000.00
Churchill County	New Fallon Office Building Acquisition	In the Spring of 2021, NDOW took ownership of the Carson Lake and Pasture property. This transfer created the 23,000 acre Carson Lake Wildlife Management Area (WMA). This project purchased a new NDOW office and warehouse at 4082 Reno Highway in Fallon, NV. This facility will expand NDOW's capacity to manage wildlife throughout the Carson Lake WMA and Western Nevada. In addition to space for NDOW staff this facility will provide NDOW with 8,000 SF of critical warehouse space to benefit NDOW field activities and habitat restoration work. This will include the maintenance of 936 water guzzlers for wildlife impacted by drought in Western Nevada.	\$ 1,310,337.97	\$ 1,310,337.97
Elko County	12th Street Pond Acquisition	This project acquired 17.19 acres adjacent to the Humboldt River in Elko. This includes the acquisition of three ponds to establish community fishing ponds, nature trails, and a nature center for Elko County residents. This project leveraged \$300,000 in other funding sources.	\$ 125,000.00	\$ 125,000.00
Clark County	Peer Property- Overton WMA Land Purchase 2	This project includes the purchase of 6.21 acres of land which will be added to the Overton Wildlife Management Area. This land will be utilized to improve wetland habitat conditions on the WMA and contains two waterfowl resting ponds. A wide range of game and non-game species at the WMA will benefit from this project, including shorebirds, waterbirds and waterfowl. NDOW plans on adding this land to the Overton WMA for wildlife and public recreation benefits in perpetuity. This project leveraged \$183,905.16 from other funding sources.	\$ 64,094.84	\$ 64,094.84
White Pine County	Steptoe Valley WMA Augmentation Test Well	The Steptoe Valley Wildlife Management Area (SVWMA) is located immediately south of Ely, along U.S. Highway 93/50 in White Pine County. The property consists of 12,806 acres and includes Comins Lake. Roads through the area provide excellent viewing of wetland dependent wildlife and upland wildlife. Species in the Steptoe Valley WMA include Rocky Mountain Elk, Mule Deer, and Pronghorn Antelope. This project would establish a test well to evaluate the local aquifer for a proposed high-yield projection well to benefit wildlife on the Steptoe Valley WMA.	\$ 165,000.00	\$ 165,000.00
Lyon County	Mason Valley Fish Hatchery Cooling Tower	Mason Valley Fish Hatchery is located within the Mason Valley Wildlife Management Area north of Yerington. The cooling tower at the facility is utilized for the aeration and cooling of water that comes into the hatchery. The cooling tower is currently at the end of its useful life. This project will refurbish the existing cooling tower. This work will include media replacement, motors, bearings, belts and bushings, clean and seal of five Baltimore Air Coil cooling towers. This major overhaul will ensure the continued operation of the hatchery.	\$ 260,000.00	\$ 260,000.00

Conservation Bond Program Project List

Conserve Nevada Bond Program Current Projects				
Location (County)	Project Title	Project Description	Bond Award/Budget Amount	Bond Expenditures to Date
Elko County	Spring Creek Partial Recirculating Aquaculture Feasibility Study	This project would fund the design and engineering of a partial recirculating aquaculture system. This would allow for the filtering and reuse of water in the fish rearing process. This study will engineer all aspects of installing PRAS on the Spring Creek facility due to continual drops in creek flows from drought years within the Great Basin.	\$ 140,000.00	\$ 123,613.00
Lander County	Battle Mountain Field Office Acquisition	The purchase of the property will leverage \$70,000 to purchase 3.009 acres located at 525 Mountain Dr. and 109 Pleasant Hill Dr., Battle Mountain, Lander County, Nevada. The property will accommodate five NDOW employees. The property includes a shop and an office building that will help support NDOWs mission. Longterm this will decrease cost to NDOW by removing ongoing rent.	\$ 350,000.00	\$ -
Subtotal			\$ 6,850,158.10	\$ 6,483,771.10

Las Vegas Springs Preserve (Sec. 2(3))				
Clark County	OriGen Museum East & Middle Exhibit Design/Engineering	The interior remodel of Springs Preserve OriGen building- East and Middle galleries will substantially overhaul two gallery spaces within the OriGen building. This improvement project will result in exhibition space(s) that feature educational and immersive experiences focused on science and sustainability in Southern Nevada. Explorations will include Mojave Desert ecosystems, adaptations, and conservation, as well as the Colorado River's vital role as a threatened natural resource for Southern Nevada and the West.	\$ 2,000,000.00	\$ 1,999,999.40
Clark County	OriGen Museum West Gallery and Outdoor Design/Engineering Phase 1	The remodel of OriGen Museum Complex at the Springs Preserve is a capital improvement project that will substantially overhaul three gallery spaces and outdoor exhibit space. The improvement project will result in exhibition spaces that feature educational and immersive experiences focused on the challenges facing natural resources, told through the story of the Colorado River, and the science and technology needed to address those challenges.	\$ 588,050.00	\$ 495,767.71
Clark County	Design Development of Interior/Exterior Remodel of Springs Preserve OriGen Building – West Exhibit Gallery and Outdoor Exhibit Space Phase 2	During the design development phase of the West Gallery and Outdoor Exhibit Space an exhibit design firm will work with the Springs Preserve, focus groups, scholars, media specialists, graphic designers, lighting specialists, and exhibit fabricators, to develop the concept, schematics and design of the museum's west gallery and outdoor exhibit space. The goal of this phase is to develop explorative experiences that engage visitors in scientific principles that support effective resource management, conservation, and sustainability. Visitors will leave these experiences with a better understanding and/or piqued interest in how science plays a critical role in current and future resource conservation and protection. Exhibition spaces will include cutting-edge, multi-media interactives as well as hands-on manipulatives that allow for immersive experiences and deeper exploration into myriad topics within the exhibition themes.	\$ 2,000,000.00	\$ -
Subtotal			\$ 4,588,050.00	\$ 2,495,767.11

Conservation Bond Program Project List

Conserve Nevada Bond Program Current Projects				
Location (County)	Project Title	Project Description	Bond Award/Budget Amount	Bond Expenditures to Date
Clark County Wetlands Park and Lower Las Vegas Wash (Sec. 2(4))				
Clark County	Wetlands Loop Trail Phase 1	This project would design the final 4.9-mile paved segment of the Wetlands Loop Trail and would begin construction on 1.7 miles of paved asphalt trail.	\$ 1,962,230.00	\$ 598,682.74
Clark County	Wetlands Park Barrier & Rock Enhancement	This project would install barriers, fencing, and rock to protect the wetlands and natural resources. This barrier will prevent motorized vehicles from entering sensitive areas of the park.	\$ 1,037,770.00	\$ -
Subtotal			\$ 3,000,000.00	\$ 598,682.74

Nevada Division of Museums & History (Sec. 2(5))				
Clark County	Boulder City Railroad Museum Visitors Center Advanced Planning	The Boulder City Railroad Museum & Visitor's Center advanced planning is being managed by State Public Works and consists of development of construction documents for a 9,700 square-foot visitors center, orientation plaza, train loading platform and facility parking for the State Railroad Museum in Boulder City. This facility will accommodate visitor services, ticketing, an information center, retail sales, museum interpretive space, and staff offices. This world-class museum will provide a new connection between Boulder City and Henderson and will become part of the gateway to outdoor recreation resources in the area in collaboration with the Boulder City Adventure Center.	\$ 1,774,117.00	\$ 1,292,376.34
Clark County	East Ely Railroad Museum Freight Depot Advanced Planning	This project is being managed by State Public Works and will complete the planning and design phase for the remodel and renovation of the East Ely Freight Barn. This remodel will include community events space, artifact storage, and exhibit space, and will include structural fire protection, building insulation, and an HVAC update for the building. The East Ely Railroad Freight Barn is 12,865 square feet and was constructed in 1906. It served as part of the Ely Depot of the former Kennecott Mine Railway until 1983.	\$ 837,089.00	\$ 716,869.82
Statewide	Nevada State Museums Deferred Maintenance Projects	This project would replace outdoor lighting at the Lost City Museum; repaint Union Pacific dining car 4813 at the Boulder City Railroad Museum; re-design the Carson City Railroad Museum store; install a jib crane at the Carson City Railroad Museum; repair archive shelving at the Nevada Historical Society; repair the HVAC at the Nevada State Museum in Carson City; replace a door at the Nevada State Museum in Carson City; restore windows at the East Ely Depot; mobilize and move collections at the East Ely Depot; and improve security systems at the Nevada State Museum Las Vegas.	\$ 291,755.00	\$ 72,787.89
Clark County	Boulder City Railroad Museum Visitors Center Construction	This project faced bidding delays due to a bid bust. The project broke ground on December 16, 2024, and is being managed by State Public Works. This project will need to be completed by 2026 to avoid arbitrage.	\$ 23,309,936.00	\$ 4,614.40
Subtotal			\$ 26,212,897.00	\$ 2,086,648.45

Conservation Bond Program Project List

Conserve Nevada Bond Program Current Projects				
Location (County)	Project Title	Project Description	Bond Award/Budget Amount	Bond Expenditures to Date
Nevada Division of State Lands (Sec.2(6))				
Lincoln County	Caliente Depot Exterior Restoration	This project is to restore the Caliente Railroad Depot. Built in 1923 and designed by architects John and Donald Parkinson (who also designed Union Station in Los Angeles, California). The Caliente Depot served as the midway point for the Los Angeles and Salt Lake Railroad (later: Union Pacific Railroad). This depot included a passenger waiting room, railroad offices, a lunch counter, ticket office, and hotel. Restoration work will focus on the exterior restorations of the stucco, replacement of the original east arcade, structural repair of soffits and columns, restoration of windows and doors, and would bring the Depot back to its original paint colors and historic appearance.	\$ 2,000,000.00	\$ 2,000,000.00
Subtotal			\$ 2,000,000.00	\$ 2,000,000.00

Competitive Grants (Sec.2(10))				
White Pine County	Nevada Division of Forestry Monte Neva Paintbrush Acquisition	This project acquired 160 acres of land 28 miles North of Ely, NV. The property contains historic elements and a geologically unique hot springs. This site and the adjacent parcel are home to roughly 90% of known Monte Neva Paintbrush. The Monte Neva Paintbrush (Castilleja salsuginosa) is considered a critically imperiled plant and a candidate for potential federal listing. Monte Neva Paintbrush is native to Nevada and has been declared critically endangered and threatened with extinction by the State Forester Firewarden pursuant to NRS 527.010. In order to preserve and protect the species this site was acquired and will be managed by the Nevada Division of State Parks in conjunction with the Nevada Division of Forestry.	\$ 330,730.30	\$ 330,730.30
White Pine County	Rocky Mountain Elk Foundation South Schell Acquisition	This project has expended \$250,000.00. Rocky Mountain Elk Foundation (RMEF) in partnership with the Nevada Department of Wildlife (NDOW) leveraged this funding with \$1,290,000 from matching sources to purchase 1,719.87 acres in White Pine County. The property has invaluable wildlife habitat as it serves as crucial summer and transitional habitat for mule deer and elk, brood rearing habitat for sage-grouse, priority year-round habitat for blue grouse, and nesting habitat for a variety of migratory birds and raptors. The property consists of inholdings with the U.S. Forest Service (USFS) and Bureau of Land Management (BLM). It is within Hunt Unit 111 and a very small portion of 222. The property consists mainly of high elevation mountain shrub habitat, several large mahogany stands, and numerous seeps and springs. This property will be integrated into the Steptoe Valley Wildlife Management Area.	\$ 250,000.00	\$ 250,000.00
Washoe County	The Conservation Fund Leslie Steamboat Buckwheat Acquisition	This project will work to leverage funding from the National Fish and Wildlife Service to acquire habitat in Washoe County, Nevada. This acquisition will acquire land South of NV 431 containing Steamboat buckwheat (Eriogonum ovalifolium var. williamsiae) a critical endangered plant species.	\$ 900,000.00	\$ -
Washoe County & Carson City	The Nevada Land Trust Eastern Sierra Nevada Project Conservation Easements	This project will leverage \$2,392,610 in Forest Legacy funding to establish 3 conservation easements on forested properties along the Eastern Sierra Front to protect forest health and prime wildlife habitat. These easements are critical to mitigate fire risk and to protect watershed health.	\$ 682,500.00	\$ -
Clark County	City of Henderson Bird Viewing Preserve Trail Improvements	The project area encompasses nearly 100 acres of basins, lagoons and evaporating ponds for bird habitat. The project will support improved pathway accessibility through improvements to 2 miles of trail within the park. This will enhance access while improving this recreational resource.	\$ 400,000.00	\$ -

Location (County)	Project Title	Project Description	Bond Award/Budget Amount	Bond Expenditures to Date
Nye County	Storm OHV Beatty Trail Development	This project seeks to complete the remaining planning and review for the construction of 65 miles of world class trails and trailheads in Beatty, NV. This project will serve as major economic development project and includes the initial construction of a segment of 15.2 miles of trail near the town of Beatty.	\$ 10,000.00	
Douglas County	Douglas County Fairgrounds Master Plan Development	This project will support the development of a Douglas County Fairground Master Plan. This plan will include multi-use facilities hosting regional events. The complex will include a 1,500-seat grandstand, horse barn, pavilion, and other amenities for recreational and public usage. The 81-acre site is adjacent to 600 acres owned by the Bureau of Land Management, which may be available for site expansion and improved access to public lands.	\$ 45,000.00	
Washoe County	National Forest Foundation (NFF) Tahoe Meadows Boardwalk Project	This project is leveraging resources from the NFF and was awarded \$107,528.37. The project will support the National Forest Foundation and its partnership with the Humboldt-Toiyabe National Forest (HTNF) to complete the reconstruction of the Upper Meadows Loop of the Tahoe Meadows Boardwalk. Located on the HTNF, the Tahoe Meadows boardwalk is a popular trail in the Carson Ranger District	\$ 107,528.37	
Lyon County	Mason Valley Conservation District Wildlife Management Area Tamarisk Mitigation Project	This project will inventory, map, treat, and control tamarisk in the wetlands of the Mason Valley Wildlife Management Area managed by the Nevada Department of Wildlife. These activities will protect habitat and the wetland environment while enhancing the habitat for fishery, big game, and waterfowl.	\$ 29,999.24	
Clark County	Southern Nevada Mountain Bike Association Red Rock Trail Development	This project will assist in development of the Redrock Canyon NCA Trail Network by supporting the adoption of nearly 101.5 miles of recreational trails. This will protect the environment while enhancing outdoor recreation for nearly 3 million visitors per year.	\$ 100,000.00	
Washoe County	Tahoe Transportation District East Shore Trail Thunderbird to Secret Harbor	Funding would support a segment of the Lake Tahoe East Shore Trail. The segment from Thunderbird Cove to Secret Harbor. This funding would be matched with \$8,606,000 in partner funding.	\$ 2,000,000.00	
Subtotal			\$ 4,855,757.91	\$ 580,730.30

Carson River and Truckee River Grants (Sec.2(10))

Washoe County	Washoe County Parks Canepa Ranch Trailhead Development	This project will support the construction of a trailhead that will provide public access to the Truckee River, adjacent public lands, and trails managed by the Forest Service. The project includes trailhead construction and design. The construction includes a new loop trail, a new ADA compliant river access trail, interpretive and wayfinding signs and kiosks, 2 ADA accessible restrooms, and landscaping and picnic areas.	\$ 748,497.00	
Douglas County	Carson Valley Conservation District (CVCD) Carson River Restoration Projects	This project will support five Carson River restoration projects. CVCD proposes to apply bioengineering treatments, sediment removal, bank shaping, rock riprap barbs, and bank protection to repair and restore the banks of the Carson River in designated project areas.	\$ 350,000.00	
Subtotal			\$ 1,098,497.00	\$ -
Total			\$ 63,789,035.80	\$ 19,802,405.49

Conservation Bond Program Project List

Conserve Nevada Bond Program Potential Projects			
Location (County)	Project Title	Project Description	Amount
Nevada Division of State Parks (Sec. 2(1))			
Nye County	Berlin Ichthyosaur Visitors Center Development	The park is home to the most abundant concentration, and largest known remains, of Ichthyosaurs, an ancient marine reptile that swam in a warm ocean that covered central Nevada 225 million years ago. The fossils are protected and displayed at the park's Fossil House. This project would support the design of new visitor center/office, new ranger residence (duplex), solar system for park power.	\$ 1,000,000.00
Nye County	Berlin Ichthyosaur Window Replacement	This project would help support the repair and replacement of deteriorating windows throughout the park.	\$ 500,000.00
Douglas County	Van Sickle State Park Site Improvements	A short walk from the Stateline, NV casinos, Van Sickle is one the most accessible parks in the Tahoe Basin. Increasing popularity of this site has placed strain on available facilities. This project would help support ongoing improvements at the Park.	\$ 500,000.00
Washoe County	Red Rock Hounds Acquisition	Red Rock Hounds property is a historic 640-acre property about 30-miles North of Reno. The Redrock hounds facility has springs, ponds, equestrian facilities, and access to federal lands and trails. This project would acquire the property for recreation.	\$ 3,500,000.00
Douglas County	Mormon Station Kinsey Property Improvements	The Kinsey House which is adjacent to Mormon Station State Historic Park was built in 1855-1856 and was one of the earliest land claims in Nevada. Stephen A. Kinsey arrived in Genoa in 1851 with Col. John Reese. Kinsey served as a clerk of the probate court and ex-officio recorder of Carson County and later became the clerk of Douglas County. In his role Kinsey helped preserve Nevada's earliest land records and claims. He was later appointed by Gov. Nye as one of the first county commissioners of Douglas County. This project would provide enhancements to the site including development of interpretive materials	\$ 250,000.00
Clark County	Trail improvements and interpretative improvements at Ice Age Fossils State Park	During the Pleistocene this park was home to species like the Columbian mammoth, American lion, camelops, ancient llamas, dire wolves, and ground sloths. Abundant fossils were discovered on this site as part of the "Big Dig" in 1962-1963. This project would support further interpretative trail development to allow access into trenches and sensitive sites.	\$ 500,000.00
Clark County	Valley of Fire Trail and Interpretative Improvements	World-renowned for its 40,000 acres of bright red Aztec sandstone outcrops nestled in gray and tan limestone, Valley of Fire State Park contains ancient, petrified trees and petroglyphs dating back more than 2,000 years. This would provide trail and site interpretation to support increase visitation at the site.	\$ 300,000.00
White Pine County	Monte Neva Site Planning & Development	Develop site planning and design for boardwalk, interpretative signage, and site protection.	\$ 500,000.00

Conservation Bond Program Project List

Conserve Nevada Bond Program Potential Projects			
Location (County)	Project Title	Project Description	Amount
White Pine County	Elgin Site Development and Trailhead	Several generations of children were educated in this one-room school, which covered grades one through eight from 1922 through 1967. This project would seek to expand this site to include trail facilities for outdoor recreation and expanded experience of this site. This funding would help support the development of OHV trailhead and the site to provide access to trails.	\$ 250,000.00
Lyon County	Walker State Recreation Area improvements	The State of Nevada benefited from an extraordinary opportunity to establish the Walker River State Recreation Area. The Walker Basin Conservancy donated more than 12,000 acres of land and nearly 30 miles of the East Walker River to the State of Nevada to increase public access and conserve natural resources. The donation includes several large ranches that had been closed to public access for more than 100 years. Today, they afford the potential for a vibrant outdoor experience that no other single Nevada State Park can provide. The state park includes five units: the Pitchfork Ranch, Rafter 7 Ranch, Flying M Ranch, the Nine Mile Ranch and the Elbow. The park units will open to the public over time, as development and infrastructure is completed. This project would provide improvements and continued development of Walker State Park to allow public access.	\$ 2,000,000.00
Lyon County	Fort Churchill Schoolhouse Structural and restoration	The Buckland Station ranch house was built in 1870. This structure served as a boarding house, and a home to the Buckland Family. Its 19 rooms included two parlors, a ballroom, a school room, teachers quarters and seven bedrooms. After 1870 a one room schoolhouse was constructed near the site of Buckland Station. There is some evidence that this schoolhouse was moved built around 1878. This one room schoolhouse was moved to Dayton around 1914. It served the Dayton area into the 1930s and was later moved to Fernley. In 1951 it was gifted to WWII veterans as a meeting hall and continued to be a VFW hall until 1972. In 2024 this schoolhouse was moved back to Buckland Station. This project would provide improvements and begin foundation work for the school.	\$ 500,000.00
Lincoln County	Cathedral Gorge Visitors Center Infrastructure and Replacement	Cathedral Gorge State Park is located in a long, narrow valley in southeastern Nevada, where erosion has carved dramatic and unique patterns in the soft bentonite clay. The park's beauty began with explosive volcanic activity that, with each eruption, deposited layers of ash hundreds of feet thick. Great walking trails abound for exploring the cave-like formations and cathedral-like spires that are the result of geologic processes from tens of millions of years ago. This project would improve infrastructure at the park and provide a visitors center for the park.	\$ 1,250,000.00
Elko County	Wild Horse State Recreation Area Campground Enhancements	This project will entail installation of electric and water hookups in campground loop #2 at Wild Horse State Recreation Area (SRA). Additionally, this project will also fund the paving of the campground loop road (this road is currently a type-2 road base/gravel).	\$ 150,000.00

Conservation Bond Program Project List

Conserve Nevada Bond Program Potential Projects			
Location (County)	Project Title	Project Description	Amount
Statewide	Nevada Historic Marker Maintenance	In 1967, the Nevada State Legislature initiated the marker program. These roadside markers bring attention to the places, people, and events that make up Nevada's heritage. This project would support ongoing maintenance for 274 historic markers statewide.	\$ 500,000.00
Douglas County	Van Sickle State Park	This project would develop ranger residents and a maintenance shop at Van Sickle State Park to support the Lake Tahoe Unit. This infrastructure is critical to serve the ongoing needs of Van Sickle State Park.	\$ 7,000,000.00
Subtotal			\$ 18,700,000.00
Nevada Department of Wildlife (Sec. 2(2))			
Statewide	Wildfire-Related Habitat Restoration	NDOW works closely with the BLM, USFS and other agencies to restore important wildlife habitat destroyed by wildfire. Following such events, there is usually a shortage of funds for necessary seeds, seedlings and related restoration work that NDOW often helps pay for. In FY 2018 alone, NDOW contributed approximately \$3 million to such projects.	\$ 1,000,000.00
Multiple Counties	Sage-grouse Habitat Restoration Projects	Includes riparian habitat, meadows, and springs restoration and protection projects in important sage-grouse habitat. Other measures that benefit sage grouse are included such as modifying or removing fences to protect flying grouse, the removal of abandoned power and telephone poles and lines and planting native seeds or seedlings or removing noxious weeds and other invasive species in important habitat.	\$ 500,000.00
Lander County	Groves Lake Spillway and Dam Maintenance and Repair	This project will consist of implementing the dam safety and maintenance activities identified by the Nevada Division of Water Resources in their June, 2017 report. These include an update of the Emergency Action Plan, repair the gate valve as needed, restore the camber on the crest of the dam, make bridge repairs, re-establish rip rap, and repair and clean the auxiliary spillway.	\$ 250,000.00
Churchill County	Carson Lake and Pasture Wetland Enhancement Projects	This project will expand and improve wetland management dikes, water conveyance and control structures to improve and increase efficiency in water management to achieve habitat management goals.	\$ 200,000.00
Statewide	Miscellaneous Conservation Easements	The funds will help NDOW pursue conservation easements with cooperating landowners to enhance or maintain habitat values on priority conservation lands for a variety of wildlife species.	\$ 500,000.00
Statewide	Bat Gate Construction and Installation	Bat-compatible gates will be constructed and installed at abandoned mine features throughout the state that provide habitat to bats but are also serious hazards to human safety	\$ 50,000.00
Nye County	Lockes Ranch Aquatic Habitat Improvement Project	This project will implement habitat restoration measures on Big Spring and other spring sources at Lockes Ranch in Railroad Valley, Nye County. These measures will protect and enhance at-risk wildlife species at the Ranch, including on the newly acquired Black Rock Station property	\$ 50,000.00

Conservation Bond Program Project List

Location (County)	Project Title	Project Description	Amount
Clark County	Wildlife Exhibits for the Vegas Valley Rim Trail	Clark County, the Southern Nevada Regional Planning Coalition and Get Outdoors Nevada are pursuing a loop of trails and open space around the Las Vegas Valley. This project would consist of NDOW designing and installing new interpretive signs highlighting the wildlife habitats and species found along the trail	\$ 100,000.00
Statewide	Wildlife Highway Crossings	Some of Nevada's highways are in areas where big game and other types of wildlife migrate or otherwise travel and cross highways. Not only are large numbers of animals killed each year at these crossings, such collisions are also a major safety hazard for drivers. NDOW is working with the Nevada Department of Transportation (NDOT) to identify the most hazardous wildlife crossings on existing state highways and freeways, and the new Interstate 11 is being proposed between northern and southern Nevada. A wide range of solutions are being considered, including some type of underpass or overpass, warning signs, and often large amounts of fencing.	\$ 500,000.00
Lincoln County	Improvements to Key Pittman WMA's Native Fish Refuge Pond	The native fish refuge pond at the WMA maintains a population of the Pahrnagat roundtail chub, a critically endangered native fish endemic to Pahrnagat Valley. This is one of only three populations of this species. This project will develop a new water supply well and complete other enhancements for long term security of the refuge facility. The existing well will remain as a backup water supply but has ongoing water quality and flow issues which could compromise the operation of the facility.	\$ 100,000.00
Statewide	Water Developments and Spring Protection and Restoration	NDOW has had much success in sustaining and expanding wildlife populations in arid areas with water developments (or guzzlers) that capture and store water from rain and snow melt, and much opportunity exists to install or upgrade more guzzlers to benefit many species. Another major water for wildlife opportunity involves protecting and restoring natural springs and seeps that have been developed and abandoned, or damaged by wild horses and other impacts.	\$ 100,000.00
Clark County	Muddy River and Virgin River Watershed Improvement Projects	These two rivers and their adjacent habitats are the home of many special status species including the Southwestern Willow Flycatcher, Yellow-billed Cuckoo, Yuma Clapper Rail, Phainopepla, Moapa dace, Moapa White River springfish, and Virgin River chub. These projects would enhance habitat for these species by completing fish passage improvements, riparian habitat enhancement, in-stream aquatic habitat and channel restoration projects that will benefit a wide range of native fish, bird and mammal species.	\$ 200,000.00
Statewide	Pinyon-Juniper Removal Projects	By removing pinyon-juniper (PJ) trees in areas where they dominate landscapes over thousands of acres and increasing the amount of native shrubs and herbaceous plants in these treated areas, NDOW and its partners can greatly enhance habitat diversity and more favorable conditions for a wide range of species, including mule deer, sage grouse, elk and many different non-game species.	\$ 500,000.00

Conservation Bond Program Project List

Conserve Nevada Bond Program Potential Projects			
Location (County)	Project Title	Project Description	Amount
Statewide	Maintenance of Existing Water Infrastructure and Rights	NDOW works with the Divisions of Dam Safety, Public Works and State Parks to inspect and maintain a large number of dams and diversion structures that impound or divert water and support valuable recreation areas and fisheries. Many of these facilities are approaching the end of their useful lives and are need of repair. In other cases, NDOW needs additional funding to maintain and protect its existing water rights that are critical for supporting many different wildlife species. Funds are needed to measure the flow of a large number of springs and as part of the Department of Water Resource's water rights process to prove that a spring is providing beneficial use to wildlife.	\$ 50,000.00
Statewide	Aspen Community Habitat Improvements	Nevada's quaking aspen trees and their associated vegetative communities are in decline but provide significant scenic values and important wildlife habitat for such species as Northern Goshawk, mule deer, Mountain Quail, various grouse, owls and Columbia spotted frog. Enhancing and protecting these communities are a high priority of NDOW, the U.S. Forest Service and BLM.	\$ 150,000.00
Statewide	Statewide Reservoir Habitat Improvements	Development of permanent structures for enhancement of reservoir fisheries habitat has been effectively demonstrated on small scales in Lake Mohave and other waters. The structures help protect young fish from predators and promote invertebrate food sources. This project will provide resources to develop in-water habitat enhancements to benefit sport and native fisheries in reservoirs statewide.	\$ 150,000.00
Statewide	PVC Mine Marker Removal	Hollow and uncapped PVC has been used to mark mine claims in many remote parts of Nevada and are literally death traps for cavity-nesting birds, reptiles, insects and rodents. It is now legal to pull the markers out of the ground and lay them down in the same spot. While NDOW has worked with many volunteers and the BLM to pull thousands of these markers, many thousands remain in harder to access locations. NDOW and the BLM need additional funding to hire crews that can access the remotest locations and stay in the field for prolonged periods of time.	\$ 100,000.00
Statewide	Fish Passage Improvements	Fish passage barriers including water diversions, culverts, and other in-stream obstacles are a critical problem and major impediment to restoring native trout and other fish populations in waters statewide. The majority of barriers have already been identified and mapped, and this project will provide resources to address them through culvert replacements and other infrastructure improvements.	\$ 300,000.00
Statewide	Guzzler Support	Project will install and support guzzlers around the state to support species during drought conditions.	\$ 100,000.00
Statewide	Recreational Enhancements	Support recreation improvements at NDOW sites around the State including Lenar Pond, 12th St Pond, and various wildlife management areas.	\$ 100,000.00
Subtotal			\$ 5,000,000.00

Competitive Grants (Sec.2(10))			
Lincoln County	Pioche Trail System:	The proposed project involves designing and constructing over six miles of new, multi-use trails within the town limits of Pioche, Nevada. This initiative, in partnership with the International Mountain Bicycling Association (IMBA), aims to enhance local recreational opportunities, promote sustainable outdoor activities, and boost community engagement. The project will begin with a comprehensive design phase, guided by IMBA's expertise in creating environmentally responsible and	\$ 638,490.00
Washoe County	Biggest Little Trail Stewardship Evans Creek Pedestrian Bridges:	Project is to install two (2) USFS spec pedestrian bridges (18' length x 4' width) on the Evans Creek Trail in City of Reno Open Space. The Evans Creek Trail is a popular and well used non-motorized multi-use trail that interconnects Washoe County Rancho San Rafael Parks trails to the USFS Peavine Recreational Trail Network and City of Reno communities. The trail has two crossings of Evans Creek that makes year-round use of the trail difficult and hazardous.	\$ 69,137.00
Churchill County	The Lahontan Conservation District Carson River Fallon Recreation Site:	The purpose of this project is to build ADA Public Restrooms at a mid-point along the Carson River in Churchill County. Yearly, thousands of river enthusiasts enjoy floating the river in kayaks, canoes, tubes, personal flotation devices, and rafts during the spring and summer. Proper management of waste and trash disposal equates to a healthier and cleaner river. A healthier and cleaner river leads to a higher level of recreational enjoyment for residents, families, and visitors.	\$ 400,000.00
Nye County	Beatty General Improvement District Amargosa River Trail:	Beatty General Improvement District would like to create a natural walking trail alongside the Amargosa River throughout the town of Beatty down to the Narrows. Possible developments include a trail head and picnic area, benches along the trail, and informative signage.	\$ 20,000.00
Douglas County	Historic Virginia & Truckee Trail V&T Trail Douglas County Preliminary Study:	Project Description for a Preliminary Study to evaluate the feasibility of constructing a multi-use trail along the historic V&T railway alignment from Heybourne Road adjacent to the IVGID treated effluent ponds in Douglas County to the southerly extension of Bigelow Drive in Carson City. The total study length is approximately 12,000 feet and would cross the floodway and floodplain of the Carson River. For approximately half the study length (6,000 ft.) the historic V&T embankment	\$ 185,000.00
Douglas County	BOR, NSHE, on behalf of the University of Nevada, Reno (Extension Proposal) Lake Tahoe 4-H Camp RV Hookups:	Nevada State 4-H Camp would like to create RV spaces and nature path through the 4-H camp property on the shores of Lake Tahoe. There is a bid of \$11,521.40 for cement pads and electrical for 5 spaces at the camp next to Lake Tahoe.. There is also funding requested for a nature trail to provide education on Tahoe's rich history and the animals and people that inhabited the area.	\$ 11,521.40

Lincoln County	Nevada Division of State Parks Elgin Schoolhouse Trailhead Development:	The Elgin Schoolhouse State Historic Site features a one room schoolhouse that was established in 1922 and is surrounded mostly by BLM property. The park is a popular stopping point for OHV's and also visitors traveling by car. Nevada Division of State Parks would like to install a restroom and amenities that would serve recreationists in the area. Specifically, this project would consist of the construction of an ADA trailhead restroom and parking, an ADA accessible walkway, picnic tables, trash r	\$ 300,400.00
Clark County	Friends of Red Rock Canyon Red Rock Canyon NCA Campsite Improvements:	Red Rock Canyon NCA Campground holds 80 individual campsites and 7 group campsites that are all in need of repair. Each campsite needs to have the concrete pads replaced.	\$ 40,000.00
Lyon County	Friends of Sutro Tunnel Charity Sutro Tunnel Interpretive Trail Network:	FOST Charity (Charity) would like consideration for two projects 1) develop a trail between the Historic Sutro Tunnel & Site to Virginia City for outdoor enthusiasts to hike and for OHV access. For the hikers, the Charity would like users to experience the area above the 3.8 mile tunnel between Dayton and Virginia City and learn about the historic site and the Shafts which are now ruins. For the OHV current users, the Charity would like riders to have the opportunity to know the history a	\$ 450,000.00
Clark County	Southern Nevada Mountain Bike Association Southwest Ridge Trails Project	The Southwest Ridge Trails Project is a plan for approximately 29 miles of natural surface trails of varying difficulty in the southwestern area of Las Vegas. The majority of the proposed trails fall on Clark County or Bureau of Land Management-managed land. These trails would connect with the proposed Red Rock Legacy Trail and Las Vegas Valley Rim Trail, as well as the proposed Southwest Ridge Bike Park. They would also form additional connections between two existing non-motorized trail networks.	\$ 1,000,000.00
Washoe, Carson, and Douglas County	Tahoe Transportation District Nevada Stateline-to-Stateline Bikeway Project	The project is included in the larger Nevada Stateline-to-Stateline Bikeway Project and is an integral part of a comprehensive corridor improvement plan, State Route 28 (SR 28) National Scenic Byway Corridor Management Plan (CMP). There have been minimal recreation planning efforts in the corridor and there are few paved, off-highway, parking spaces associated with the recreation areas. This leads to hazardous shoulder parking, which can exceed over 1,000 vehicles on summer days.	\$ 46,120,000.00
Mineral County	Walker Basin Conservancy Fletcher Springs Restoration	This project will enhance wetland habitat at Fletcher Spring in Mineral County, Nevada, and improve interpretation and sustainable recreational use of the site. To enhance roughly 12 acres of wetland, Walker Basin Conservancy (WBC) will install pipe-rail fence to prevent grazing impacts from livestock and feral horses and add recreation infrastructure to prevent habitat degradation caused by visitors to the site. Restoring and enhancing wetlands at Fletcher Spring will benefit a variety of wildlife.	\$ 280,000.00

Conservation Bond Program Project List

Conserve Nevada Bond Program Potential Projects			
Location (County)	Project Title	Project Description	Amount
Lander County	Ducks Unlimited, Inc. Argenta Wildlife Management Area Improvements	The State of Nevada recently acquired the Argenta Wildlife Management Area (WMA) outside of Battle Mountain, NV. This new WMA is a 1500-acre property will be managed by Nevada Department of Wildlife and encompasses parts of Rock Creek and the Humboldt River and important wet meadow resources. As a newly acquired WMA, there are improvements needed to enhance these habitats for native species. Grant funds would be used to improve flood-irrigation infrastructure within the Humboldt River.	\$ 1,500,000.00
Lyon County	Ducks Unlimited, Inc. Mason Valley WMA Wetland Improvements	Nevada Department of Wildlife (NDOW) acquired the initial 8,788 acres of Mason Valley Wildlife Management Area (MVWMA) in 1955 for its wildlife value, with priority given to waterfowl and wetland development. This project would enhance wetland infrastructure.	\$ 650,000.00
Lincoln County	Lincoln County Regional Development Authority Lincoln County Fuels Reduction	The Bureau of Land Management has approved several watershed scale fuels reduction projects on 124,000 acres of BLM lands in eastern Nevada. This first phase carried out under a Stewardship Agreement will treat approximately 6,000 acres in Hamblin Valley, Lake Valley and South Spring Valley. Pinyon Juniper trees removed from BLM lands will be utilized as feedstock for a renewable biofuels project located at the Lincoln County Renewable Energy and Sustainability Complex (LCRESC) at Crestline, Nevada.	\$ 4,000,000.00
Clark County	Muddy River, Virgin River, and Meadow Valley Wash Acquisitions	Acquisition Project: Properties (land and/or water rights) would be identified and further evaluated for acquisition along the Muddy River, Virgin River, and Meadow Valley Wash to increase the number of acres that are conserved within the riparian corridor to protect and enhance wildlife habitat. Inventory Project: Inventory and monitoring of the extent and quality of habitat for riparian birds on the Clark County Riparian Reserve Units is necessary to establish baseline conditions.	\$ 2,150,000.00
White Pine County	Eastern Nevada Landscape Coalition Duck Creek Basin Watershed Improvements	All the creeks in Duck Creek Basin are eventually channeled into pipes which once served the Kennecott mine and smelter in McGill. That water now goes to dust abatement on the tailings pile. However, both North Creek and Duck Creek each have about 5 miles of free flow before going into the pipe. The Duck Creek reach is heavily impacted by grazing. North Creek is heavily incised on some portions. Both creeks supported fishing in the past but are no longer used by the community. Project would provide watershed improvements.	\$ 1,238,352.00
Washoe County	Truckee Meadows Park Foundation Rosewood Lakes Trailhead Development	Pedestrian and bicycle access point to the Veterans Shared-Use Pathway, that will further connect users to nearby trail systems. To commence a trailhead construction process with a private-sector firm that will implement the results of the design phase of this project. The Rosewood Trailhead Phase One Design project, currently underway, is a survey of the site, development of design opportunities, and the selection of facility options.	\$ 610,000.00

Conservation Bond Program Project List

Location (County)	Project Title	Project Description	Amount
Washoe County	Truckee Meadows Parks Foundation Rosewood Nature Study Area Phase III	The Truckee Meadows Parks Foundation (TMPF) is applying for support of Phase III of restoration of the Rosewood Nature Study Area (Rosewood). Rosewood is a 219-acre decommissioned golf course located in the Truckee River Corridor, encompassing Boynton Slough and Steamboat Creek. When TMPF acquired Rosewood in 2019, the golf course was overrun with invasive weeds, had poor water quality, and offered no recreational opportunities. TMPF's ongoing restoration efforts and educational infrastructure projects will support the development of the wetlands area.	\$ 718,410.00
Washoe County	Keep Truckee Meadows Beautiful KTMB Restoration Project	KTMB works to both keep the Truckee River corridor clean as well as reducing invasive weeds and planting trees/plants. We work in public spaces within the Truckee Meadows as requested by cities, counties, and federal land organizations such as BLM and USFS. KTMB requests funding to assist in the Truckee River Cleanup in September of 2025 as well as ongoing projects during the year. Additionally, we will be asked to assist in revegetating Davis Creek Regional Park after the recent fire.	\$ 150,000.00
Eureka County	Eureka County and Eureka Conservation District Diamond Valley Water Right Retirement	This project proposes to acquire and permanently retire additional groundwater rights in Diamond Valley to help stabilize the aquifer and protect groundwater dependent resources. Based on the success of the Nevada Water Conservation Infrastructure Initiative and the interest in NWCII that could not fund all applications and interests, this project will meet an unmet need. The processes developed in the NWCII process through the Central Nevada Regional Water Authority, including restrictive covenants, will	\$ 5,500,000.00
Multiple Counties	Friends of Nevada Wilderness Southern Nevada Springs Restoration Project	The Southern Nevada Springs Restoration Project proposes to perform volunteer-based spring restoration activities at 15 springs to make them healthier and more resilient. Activities include invasive weed management, removal of non-functioning spring developments and other trash, and protection of sensitive and threatened species such as the Relict Leopard frog and spring snails. Projects will be 12 single-day projects and 3 multiple-day, camping projects for hard-to-reach locations.	\$ 85,068.97
Nye County	STORM-OV, Inc Beatty Trail Construction	Beatty Trails construction, "Advancing our existing efforts expanding recreational and continued education of our celebrated conservation efforts". Building a trail system linking the community of Beatty to its history, conservation and view-scapes of Southern Nevada's Oasis Valley.	\$ 750,000.00
Multiple Counties	Eastern Nevada Landscape Coalition (ENLC) Weed Noxious Mitigation Outreach and Education	The grant would fund 9 Cooperative Weed Management Areas (CWMA) in four counties, grow the number of members in each CWMA, expand the outreach and educational events of each CWMA and to establish CWMA's in counties that would like to have one. Currently, the CWMA's each applies for grants from the Nevada Dept of Agriculture for funding. This grant would fund all the CWMA's that ENLC currently works with for 2 years and provide the outreach and education.	\$ 1,708,262.00

Conserve Nevada Bond Program Potential Projects			
Location (County)	Project Title	Project Description	Amount
Lyon County	Walker Basin Conservancy Smith Valley Trail Development and Noxious Weed Treatment	This project will restore wetland habitat and provide a trail system and public access to an 800-acre ranch owned by the Walker Basin Conservancy (WBC) in Smith Valley, Nevada. The proposed work includes restoring riparian habitat on roughly two miles of the West Walker River by removing invasive Russian Olive trees, treating noxious weeds, and planting several thousand native plant seedlings. WBC will also partner with Ducks Unlimited to restore wetland habitat in fields adjacent to the riparian corridor	\$ 600,000.00
Washoe County	One Truckee River John Champion Park Restoration Project	The Project will enhance and restore an urban section of the Truckee River at John Champion Park (1.6 acres with 817 feet-long riverbank) by repurposing cement on the shoreline and conducting riverbank restoration. Recent accomplishments will be leveraged: OTR Framework Plan; Brodhead Park loo installed in 2020; Brodhead Park Riverbank Restoration Project at 60% design and fully funded; and a loo installed in 2023 at John Champion Park. OTR will coordinate with its neighbor, Reno-Sparks Indian Colony (RSIC)	\$ 300,000.00
Lincoln County	Lincoln County Conservation District Pahranagat Valley Russian Olive Treatment	Russian olive is an exotic invasive tree that has the infested riparian forest and wet meadows in the Pahranagat Valley, in Lincoln County, Nevada. Russian olive trees impact the ecosystem in several ways competing with native cottonwoods and willows, interfering with natural plant succession, and taxing water reserves. This impacts wildlife habitat and populations including mule deer, endemic fish, endangered birds, and migratory birds.	\$ 90,000.00
Elko County	The Nature Conservancy in Nevada Clover Valley Conservation Easement	Establishment of Clover Valley Conservation Easement in Wells, NV (Elko County). This 12,000 Acres will be protected under the CE agreement with the he Clover Valley parcels are a mountainous property within the East Humboldt Range. The property is bounded on the north, south and west by private lands, and to the East by United States Forest Service (USFS) and East Humboldt Wilderness Area.	\$ 1,500,000.00
Lyon County	Walker Basin Conservancy Rosaschi Ranch Riparian and Wetland Restoration	Rosaschi is a former ranch property on the East Walker River now managed by the US Forest Service. The former ranch is 2395 acres spread along approximately 6 miles of the river below Bridgeport Reservoir. The Walker Basin Conservancy (WBC) proposed to conduct restoration in the riparian corridor and floodplain to enhance seasonal wetlands, mitigate motorized recreation impacts from user created routes, and develop new recreation infrastructure.	\$ 315,000.00
Lyon County	Walker Basin Conservancy East Walker Riparian and Wetland Restoration Project	Walker Basin Conservancy proposes to partner with the Walker River State Recreation Area (WRSRA) and Nevada Division of Forestry (NDF) on a wetland and riparian restoration project along the East Walker River on WRSRA and WBC Properties. The East Walker and its tributaries create critical wetland and riparian ecosystems for sensitive species including the Bi-state Sage Grouse, Yellow Billed Cuckoo, and Monarch Butterflies.	\$ 750,000.00

Conservation Bond Program Project List

Conserve Nevada Bond Program Potential Projects			
Location (County)	Project Title	Project Description	Amount
Washoe County	Tahoe Rim Trail Association (TRTA) Tahoe Meadows Restoration Project	This project will improve the Tahoe Meadows Interpretive Loop Trail to make it the first backcountry trail in Tahoe that meets accessibility requirements. New boardwalk sections and drainage improvements will also enhance the protection of Tahoe Meadow's wetland habitat through restoration and surface upgrades. At its completion, this trail will offer individuals with disabilities the chance to explore Tahoe's recreational opportunities while minimizing human impacts on the environment.	\$ 500,000.00
Elko County	Nevada Division of State Parks Wild Horse State Recreation Area Campground Enhancements	This project will consist of installation of electric and water utility hookups in Campground Loop #2 at Wild Horse State Recreation Area (SRA). Additionally, this project will also fund the paving of the campground loop road (this road is currently a type-2 road base/gravel).	\$ 1,555,000.00
Clark County	Boulder City Conservation Easement and Restoration	The Boulder City Conservation Easement (BCCE) is over 87,000 acres of protected desert habitat just south of Boulder City Nevada. The land is owned by Boulder City and managed by the Clark County Desert Conservation program (DCP). The easement is home to a variety of desert wildlife, including the federally listed Mojave desert tortoise. The BCCE has been a popular recreation location for local off-road vehicle recreationists for many years. This project would restore area while maintaining recreational access.	\$ 190,000.00
Elko County	Rocky Mountain Elk Foundation (RMEF) Windermere Hills Conservation Easement	RMEF and a private landowner are working to complete the Windermere Hills Conservation Easement (CE) and Access Easement (AE) Project (the "Project"). The Project will protect approximately 21,449 acres of sagebrush steppe, wet meadow, and native grassland habitat for greater sage-grouse, mule deer, elk, pronghorn antelope, and a myriad of non-game species, as well as open the property for public recreation via a permanent recreational AE for the enjoyment of public hunters, anglers, backpackers, horse pack.	\$ 4,051,500.00
Washoe County	High Fives Foundation Accessible Adaptive Sport Facility Development	Project is for the design and construction of a 100% accessible adaptive sports facility at Sky Tavern Resort in Reno, Nevada. Sky Tavern is a City of Reno owned, nonprofit-operated mountain biking destination that is free to the public, no lift tickets required.	\$ 299,863.00
Lyon County	The Lahontan Conservation District (LCD) Carson River Restroom Project	The purpose of this project is to build ADA compliant Public Restrooms for public use at a midpoint along the historic Carson River. Students, community, visitors, and recreationists currently use the Porta Potty that is location on the land adjacent to the river, as well as, the trash receptacles nearby. The Porta Potty, unfortunately, is challenging for those with special needs or abilities.	\$ 550,000.00

Conservation Bond Program Project List

Conserve Nevada Bond Program Potential Projects			
Location (County)	Project Title	Project Description	Amount
Washoe County	Washoe County - CSD - Regional Parks & Open Space Swan Lake Nature Study Area Improvements	The Swan Lake Nature Study Area (SLNSA), located in Lemmon Valley, provides public access to Swan Lake for wildlife and bird viewing in addition to providing recreational facilities. The SLNSA includes a parking area, portable restroom, trails, outdoor classroom, interpretive signage, and a floating boardwalk. Washoe County Parks partnered with the Nevada Land Trust to negotiate the purchase of an adjacent privately owned parcel (APN: 568-100-12) for inclusion as part of the SLNSA.	\$ 2,200,000.00
Washoe County	Washoe County - CSD - Regional Parks & Open Space Michael D. Thompson and Ballardini Trail Connector	This project includes construction of approximately 13.1-miles of new singletrack multi-use trail to connect the Ballardini Ranch Trailhead to the Michael D. Thompson Trailhead. New trail construction will follow the Forest Service Class III trail building standards and will utilize current best practices for sustainable trail design. This project will occur in two phases. Phase 1 includes approximately 7.7-miles of new trail construction between the Michael D. Thompson Trailhead and Hunter Lake Road .	\$ 1,005,000.00
Washoe County	Washoe County - CSD - Regional Parks & Open Space South Valleys Regional Park Development	Build-out of South Valleys Regional Park based on the 2015 Master Plan. Design plans are already complete for the next phases of development and include parking lots, ball fields, flat fields, dog park, and restrooms. Phase 1 is already funded and includes parking lot and access road development only. The remaining project elements shown in the design plans can be broken down into multiple phases for the ball fields, flat fields, dog park, and restrooms depending on the total amount of grant funding.	\$ 14,000,000.00
Nye County	Pahrump Valley Fairgrounds Improvements	The Pahrump Valley Fairgrounds is a 427 acre property owned by Nye County which is being developed to offer the community a centralized location to participate in several recreational activities. Ongoing CDBG grants have been utilized to get the infrastructure installed including electrical lines, wells, pipelines and septic systems. The Fairgrounds will consist of a 28,465 sf civic center that will include basketball, racquetball, and pickleball courts, a 40 acre OHV park.	\$ 1,600,000.00
Washoe County	Washoe County - CSD - Regional Parks & Open Space Canepa Carcione Phase II	Washoe County developed the Carcione and Canepa Ranch Recreation Access Plan which was approved by the Open Space & Regional Parks Commission on June 7, 2022. The Recreation Access Plan recommends a variety of improvements on the Carcione and Canepa Ranch open space properties along the Truckee River. Proposed new infrastructure includes a trailhead with amenities, interpretive signage, shade structures, and picnic areas.	\$ 950,000.00
Carson City	Backcountry Hunters & Anglers Bitterbrush Habitat Restoration	Using a combination of volunteer and contract labor, we plan to plant 40,000+ bitterbrush plants in partnership with the Bureau of Land Management and the Nevada Department of Wildlife over a three year period to aid in significant habitat restoration efforts within the Carson City District in the wake of multiple devastating wildfires.	\$ 300,000.00

Conservation Bond Program Project List

Conserve Nevada Bond Program Potential Projects			
Location (County)	Project Title	Project Description	Amount
Nye County	Nye County Shooting Range	Nye County would like to construct a shooting range for the residents of the Town of Pahrump and the county. This project will be located on a 30 acre parcel at the intersection of Mesquite Ave and Higley Road that is owned by the county and will neighbor an existing training facility currently utilized by the Sheriff's Office and the Department of Emergency Management. The project will include a minimum of ten (10) firing lanes as well as an area for trapshooting/skeet shooting.	\$ 440,210.00
Humboldt County	Humboldt County Chimney Reservoir Enhancements	The Chimney Recreation Area Revitalization Project is intended to upgrade and replace the existing restroom structures and camping amenities that are over three decades old and no longer viable. In addition to the needed upgrades and replacement of degraded facilities and amenities, Humboldt County seeks to engage in creating a recreation master plan for the area that incorporates community stakeholders and agency partners. Humboldt County intends on creating designated walking and OHV trail systems in the area.	\$ 250,000.00
Elko County	Elko County Fire Protection District River Restoration Project	The City of Elko and Elko County River Restoration Project seeks to rehabilitate and enhance the ecological integrity of the river system, ensuring long-term sustainability while addressing critical environmental challenges. This project focuses on restoring degraded riverbanks, improving water quality, and mitigating problematic vegetation growth along key stretches of the river. The ultimate goal is to create a resilient, thriving ecosystem that benefits both the environment and the local community.	\$ 200,000.00
Multiple Counties	National Forest Foundation Priority Landscapes Wildfire Mitigation	This Project covers the Sierra and Elko Fronts Wildfire Crisis Strategy Landscapes as designated as part of Phase 2 of the Wildfire Crisis Strategy in 2023 under the Wildfire Crisis Strategy where funding from the Bipartisan Infrastructure Law (BIL) and Inflation Reduction Act (IRA) along with other appropriations could reduce exposure of communities and infrastructure to the risk of catastrophic wildfire. As a partner to the Forest Service, the NFF's goal is to plan and implement vegetation management projects.	\$ 15,000,000.00
Elko County	Elko Trail System Initiative/ Northeastern Nevada Stewardship Group/ Elko County Elko Trail System Humboldt-Rubies Trail Connector	ETSI is working to develop near-town trails. Using RTP funds, the group is currently working through NEPA to bring Lamoille Summit Trail System into construction in 2025. NDOT has funded a feasibility study for a regional multi-use path that connects our communities to this system and other recreational assets. Conserve Nevada objectives would fit well with connecting a portion of this path, the Humboldt-Rubies Trail, to the California Trail Interpretive Center.	\$ 10,000,000.00
Washoe County	City of Reno Truckee River Cantilever River Path Construction	Truckee River Vision Plan priority rated as highest. Construct a cantilevered trail section between Lake Street and Museum Drive. Distance of approximately 0.13 mi.	\$ 2,200,000.00
Washoe County	City of Reno Virginia Lake Wetlands Water Quality - Phase 1	The project will include pump features to promote aeration and circulation of the water to improve water quality.	\$ 2,800,000.00

Conservation Bond Program Project List

Carson River and Truckee River Grants (Sec.2(10))			
Lyon County	Dayton Valley Conservation District (DVCD) Carson River Channel Maintenance	The District aims to perform river project maintenance, channel snagging and clearing along its top ten highest priority sites throughout the project area. DVCD is currently in the process of revisiting 50+ of its past river restoration sites, which utilized a combination of bioengineering, stream barbs, and rip rap to help prevent river erosion throughout the Carson River Corridor. The District is assessing each project site for damage and needed repairs and establishing a list of the top ten highest prior	\$ 2,500,000.00
Lyon County	Dayton Valley Conservation District (DVCD) Carson River Bank Stabilization	The District aims to perform new riverbank stabilization projects throughout the Dayton Valley portion of the Carson River Corridor. DVCD is currently in the process of surveying and monitoring the state of the riverbank throughout the project area and is in contact with both public agencies and private landowners to identify sites in need of new riverbank project construction. The district aims to construct a new stabilization project in a high priority area along the corridor.	\$ 2,500,000.00
Washoe County	City of Reno Bank Stabilization near Booth Street behind River's Edge Apts. to the SE of the bridge	Damage to the south bank of the Truckee River occurred during the 1997 flood event. Twenty-seven years have passed and erosion control measures along this portion of the Truckee River have not materialized. The City has continued to monitor the south bank erosion for safety and water quality. The need to address this project has increased with additional high water events in 2005, 2017, 2019, and 2023.	\$ 2,000,000.00
Lyon County	Dayton Valley Conservation District Carson River Noxious Weed Projects	The District aims to perform noxious weed abatement along the approx. 6 mile stretch of Carson River Corridor in an effort to protect the watershed and Fremont Cottonwood forest in this area. The District is currently in the process of surveying this entire project area for several noxious weed species.	\$ 200,000.00
Carson City	Carson Water Subconservancy District (CWSD) Carson River Geomorphological Study:	CWSD is requesting funds to conduct a geomorphological assessment, create a sediment transport model, and develop a prioritized plan for project implementation based on the information gathered for the Carson River Watershed (Upper watershed in CA has received Clean Water Act Section 319h funds to complete these tasks for the West and East Forks). The Carson River carries a lot of sediment and is extremely incised in areas, limiting its access to the floodplain. Vegetation on the banks has been denuded due	\$ 850,000.00
Washoe County	City of Reno Low Head Dam Investigations	Truckee River Vision Plan priority rated as highest. Conduct feasibility investigations for dam removal	\$ 120,000.00
Washoe County	City of Reno Remove in river hazards	Truckee River Vision Plan priority rated as highest. Identify and remove rebar and other hazardous anthropogenic debris in river.	\$ 500,000.00

Attachment A

Conservation Bond Program Project List

Conserve Nevada Bond Program Potential Projects			
Location (County)	Project Title	Project Description	Amount
Washoe County	City of Reno Dickerson Trail Bridge Design	Truckee River Vision Plan Priority rated as highest. Design and permitting for key pedestrian bridge connectivity from Idlewild Park to Dickerson Road.	\$ 600,000.00
Washoe County	City of Reno Truckee River Overlay Zone District	Truckee River Vision Plan priority rated as highest. Hire a consultant to work with the City of Reno Planning Staff to create a Truckee River overlay Zone District that encompasses City of Reno parcels within 200' of the Truckee River mean waterline. This District will exclude Single Family zoning. This District will guide future development, redevelopment and adaptive reuses.	\$ 300,000.00
Washoe County	City of Reno Design and build a consistent path	Truckee River Vision Plan High Priority. Design a distinct consistent path design including standard trail widths, materiality, directional pavement markings and continue expansion of signage, and wayfinding to unity the TPT.	\$ 400,000.00
Washoe County	City of Reno Develop a Blueway Plan	Truckee River Vision Plan High Priority. The plan should create river-based signage and wayfinding by providing a map and information on put-in and take-out locations, ramp accessibility, at launches, adjacent park amenities (restrooms, picnic tables, etc.), hazards to be aware of at various water levels, portage options, and areas of interest.	\$ 300,000.00
Washoe County	City of Reno Reno Fire Dept. Swift Water Entry Team River Access Points	Truckee River Vision Plan High Priority. Design and construct improvements to river access points for Reno Fire Dept. Swift Water Entry Team.	\$ 200,000.00
Washoe County	City of Reno Public Safety Access Points	Truckee River Vision Plan High Priority. Design, construct and maintain identified access points for Police Dept., Park Rangers, Ambassadors and other public safety officials every 100 yards along the river to provide access and visibility to patrol encampments along the river.	\$ 200,000.00
Washoe County	City of Reno Brodhead Park	Truckee River Vision Plan High Priority. Design and construct park improvements including a new community garden and rental and visitor kiosk. Expand Park boundary to include the adjacent parking lot.	\$ 1,500,000.00
Washoe County	City of Reno Kuenzli Greenbelt	Truckee River Vision Plan High Priority. Design and construct linear park improvements including fishing platforms, trail paving, lighting, signage, site furniture and public art at the Kuenzli Bridge underpass.	\$ 1,500,000.00
Washoe County	City of Reno John Champion Park	Truckee River Vision Plan High Priority. Design and construct a new nature playground with an educational component highlighting the Truckee River. Improve the event lawn area and refurbish the pavilion structure. Design in conjunction with RSIC property to ensure better park visibility from Kuenzli Street.	\$ 1,500,000.00
Washoe County	City of Reno Reno East Trail Connection Construction	Truckee River Vision Plan High Priority. South side of the Truckee River, connecting John Champion Park to Grand Sierra Resort utilizing the existing Walmart Trail. Pedestrian only trail.	\$ 900,000.00
Subtotal			\$ 16,070,000.00
Total			\$ 214,638,961.26

Lake Tahoe Environmental Improvement Program (EIP) projects funded by general obligation bonds

Tahoe Environmental Improvements Program Current Projects					
Projects are carried out by the Nevada Tahoe Resource Team, consisting of staff from the Divisions of State Lands, State Parks, and Forestry, and the Department of Wildlife					
Entity Implementing Project	Location (County)	Project Title	Project Description	Bond Award/Budget Amount	Bond Expenditures to Date
NTRT - NDSP	Stateline (Douglas)	Van Sickle Phase 3	Van Sickle Phase 3 is an improvement to the Van Sickle Bi-State Park Phase 1. Nevada State Parks has hired a contractor to design a visitor center, improved parking, and restrooms. The visitor center will include park offices, a gift shop, and interpretive spaces. A multi-use paved path is being planned from the visitor to the center to the state border. The planning team is coordinating with California Tahoe Conservancy to continue the path to Lake Parkway. An improved Stateline monument is being planned for the Nevada/California Stateline that will include additional interpretive opportunities. Construction is tentatively planned for the summer of 2026.	\$1,889,177.00	\$947,791.00
NTRT - NDSP	Stateline (Douglas)	Van Sickle Phase 2	This project involves new park improvements at Van Sickle Bi-State Park. Plans currently call for the construction of employee housing and a maintenance shop. Employee housing will provide affordable housing to park employees and allow for rangers to be stationed onsite. An improved maintenance facility will allow park staff to station maintenance personnel onsite. The facilities will be utilized to support future developments at Van Sickle Bi-State Park. Construction is anticipated to begin during the summer of 2026.	\$200,000.00	\$64,557.50
NTRT - NDSP	Stateline (Douglas)	Van Sickle NEPA	Funding for the 2019 Van Sickle Bi-State Park Vision Plan improvements will come from federal funding sources such as Land and Water Conservation Fund (LWCF) and Recreational Trails Program (RTP). To access these funds, an environmental assessment (EA) and Section 106 evaluation are required. This process will analyze the proposed park improvements outlined in the 2019 vision plan for environmental, social and economic effects and allow for public comment. The expected completion is July of 2025.	\$98,500.00	\$8,517.45
NTRT - NDSP	Incline Village (Washoe)	Sand Harbor Comfort Station Replacement	Project calls for the replacement of three existing comfort stations all constructed in the 1970s. The largest comfort station serves the Shakespeare Stage and is undersized for current visitation. This project is in partnerships with State Public Works.	\$750,000.00	\$0.00
NTRT - NDSP	Glenbrook (Douglas)	Spooner Phase 3	The Spooner Lake Front Country Phase III project includes a new lake viewing platform and a non-motorized boat launch to provide high quality visitor services at Spooner Lake in Lake Tahoe Nevada State Park. The Non-Motorized Boat Launch will be a concrete ramp that begins above the high-water mark and curves into the lake following the natural contour of the lake bottom. The Lake Viewing Platform is an elevated walkway leading to a square or rectangular platform with benches, supported by piers.	\$578,820.00	\$39,575.00
NTRT - NDSP	Incline Village (Washoe)	Sand Harbor Master Plan	Project calls for the replacement of three existing comfort stations all constructed in the 1970s. The largest comfort station serves the Shakespeare Stage and is undersized for current visitation. This project is in partnerships with State Public Works.	\$511,527.00	\$230,159.15
NTRT - NDSP	Glenbrook (Douglas), Rural Carson City, Rural Washoe County	Spooner Lake and Backcountry State Park Master Plan	This project will update the parks' master plan for the park. The primary goal of this project is to move non-motorized users off the parks service roads and improve connectivity to the backcountry trail system. A planning firm will be utilized to complete a resource assessment of the project area. The resource assessment will identify wildlife, water quality, forest health, and historical resource concerns. The team will utilize the resource assessment to identify possible trail corridors for trail construction or improvements. New trail corridors that meet the project goal will then receive further environmental review and trail construction documents will be produced.	\$170,131.00	\$0.00

Attachment B

Lake Tahoe Environmental Improvement Program (EIP) projects funded by general obligation bonds

Entity Implementing Project	Location (County)	Project Title	Project Description	Bond Award/Budget Amount	Bond Expenditures to Date
NTRT - NDF	Rural Carson	Marlette Summit Hazardous Fuels Reduction	This is a 232 acre fuel reduction project within Lake Tahoe Nevada State Park located outside of the Marlette basin watershed boundary, south and west of Marlette Lake. Treatment areas will modify fire behavior for wildland fire progressing from the south and west to the east, upslope towards the Marlette basin. Project would connect a large contiguous area where hazardous fuel reduction has been completed in the past.	\$550,000.00	\$0.00
NTRT - NDF	Nevada Tahoe Basin	General Forest Health Treatments	This project is a series of treatments located throughout Lake Tahoe Nevada State Park. Projects include hand thinning, brush mastication, aspen regeneration, pile burning, and broadcasting burns.	\$1,000,000.00	\$42,820.00
NTRT - NDSL	Nevada Tahoe Basin	Urban Lots Fuels Treatments	This project is ongoing treatment of the NDSL Managed Urban Lots. Lots require treatment every 5-10 years to follow natural fire cycles. Projects include hand thinning, hazard tree removal, pile burning, and aspen regeneration. Work is supplemented with grants.	\$500,000.00	\$154,596.00
NTRT - NDF	Incline Village (Washoe)	Bon Pland Hazardous Fuels Reduction	This project is an 85 acre fuel break located on both the north and south side of Bon Pland Creek. This is the first major drainage south of Tunnel Creek. The proposed treatment will augment fuel reduction completed from Sand Harbor north to Tunnel Creek east of Highway 28. Project area is located in the lower reaches, west end, of the drainage. Project was larger completed with a USFS grant, however remaining piles will be treated with bond funding.	\$100,000.00	\$1,200.00
NTRT - NDF	Incline Village (Washoe)	Tunnel Creek RX Burn	The Tunnel Creek Prescribed Fire seeks to reintroduce low intensity fire to the Tunnel Creek Drainage.	\$300,000.00	\$760.00
NTRT - NDSL	Stateline (Douglas)	Kahle Complete Streets	This project proposes to transform Kahle Drive into a complete street by improving drainage, adding sidewalks, bike lanes, crosswalks, a safe intersection, and undergrounding overhead utilities. This 0.5 collector road provides key linkages to the existing Stateline to Stateline bike trail, trails throughout Rabe Meadow, and a Douglas County community center. The current condition of the road is highly degraded, unsafe, and a detriment to water quality and the adjacent public lands. NTRT is funding the project's stormwater improvements.	\$1,592,000.00	\$36,365.00
NTRT - NDSL	Incline Village (Washoe)	Upper 3rd and Rosewood Creeks WQIP Phase 1	This is a water quality improvement project located in Incline Village. The area is highly connected to Lake Tahoe and is a priority treatment area due to a relatively large baseline FSP load. The project proposes to install stormwater treatment BMPs and shoulder stabilization within the existing Washoe County right-of-way and undeveloped public parcels, providing treatment for urban stormwater runoff to meet the Lake Tahoe TMDL.	\$742,458.00	\$0.00
NTRT - NDSL, NDF, NDOW, NDSP	Glenbrook (Douglas)	Spooner Meadow Restoration	Spooner Meadow is an important ecosystem along Tahoe's east shore. It provides cover, perennial water, and food resources for over one hundred species of wildlife. Historical water channelization, grazing, logging, and a lack of natural fire events have reduced its capacity to function as a normal, healthy meadow ecosystem. Climate change threatens to eliminate Tahoe's meadows via reduced snowpacks, declining groundwater, and warmer temperatures. Restoration of Spooner Meadow would maintain its role as a vital wildlife nesting and migration corridor. Restoration will involve Nevada Division of State Parks in order to balance natural resource objectives with recreational opportunities.	\$303,850.00	\$0.00
NTRT - NDSL, NDOT, NDSP	Glenbrook (Douglas)	SR 28 Spooner Mobility Hub and AIS Inspection Station	The project includes design and construction of a transit mobility hub with 250 parking spaces and restrooms, an AIS inspection station, 0.5 miles of multi-use path and a pedestrian crossing from Spooner State Park to the junction of SR28 and US50 adjacent to transit mobility hub.	\$5,000,000.00	\$0.00

Lake Tahoe Environmental Improvement Program (EIP) projects funded by general obligation bonds

Entity Implementing Project	Location (County)	Project Title	Project Description	Bond Award/Budget Amount	Bond Expenditures to Date
NTRT - NDSL	Glenbrook (Douglas)	Cave Rock GID Water Quality Improvement Project	This Project will address existing infrastructure that is old, failing and creating erosion issues within the Cave Rock Estates neighborhood and adjacent US Forest Service and NDSL parcels. The bedfilter, redesigned in 2016, is large enough to treat all stormwater runoff from the Cave Rock Estates neighborhood. Thus, addressing erosion issues and redirecting flow to the bedfilter basin will encompass the majority of design and planning work for the Cave Rock GID Water Quality Improvement Project.	\$200,000.00	\$0.00
NTRT - Admin	Lake Tahoe Basin (Nevada)	Personnel Costs	These funds are utilized to fund several positions on the NTRT for the biennium	\$800,000.00	\$246,000.00
Totals				\$15,286,463.00	\$1,772,341.10

Cultural Centers and Historic Preservation Grant Program Project List

Location (County)	Project Title	Project Description	Bond Award/Budget Amount	Bond Expenditures to Date
Clark	City of Boulder City Water Filtration Plant	Lead paint mitigation, electrical work, window rehabilitation, brick work and other preservation efforts to allow the building to be accessible to the public.	\$199,880.00	\$0.00
White Pine	City of Ely Hall Project Design, Architecture and Engineering	Complete building programming, design and construction drawings for total renovation of the building. Design to contemplate historic preservation, life safety issues, accessibility, and staff and community needs.	\$418,100.00	\$418,100.00
Mineral	Old Glory Theatre Co Theatre Restoration	HVAC Installation, plumbing, and restoring neon sign	\$227,238.00	\$227,238.00
Elko	City of Wells El Rancho Revitalization	Design and construction to complete electrical work on the first floor.	\$74,277.00	\$74,277.00
Elko	City of Carlin Old Church on Main	Roof replacement.	\$102,580.66	\$5,833.82
White Pine	Nevada Northern Railway Foundation, Inc. Engine House/Machine Shop Building	Roof repairs and weatherization of windows	\$404,828.42	\$158,344.00
Esmeralda	The Goldfield Historical Society Goldfield Historic Building Restoration Project	Complete roof reconstruction	\$399,462.33	\$399,462.33
Elko	Carlin Historical Society Carlin School House Rehabilitation	Asbestos Removal, restoration of brick exterior, gutter system replacement, construction plans for ADA accessible rear entrance.	\$178,729.00	\$22,069.68
2024 Fall Bond Sale (B24A)				
Storey	Comstock Cemetery Foundation Silver Terrace Visitor Center Restroom/Wash Station Construction	Construction of restroom/wash station	\$0.00	\$0.00
Washoe	Reno First United Methodist Church Update/Replace Building Heating Systems	Replace HVAC System	\$115,000.00	\$0.00
Storey	Western Missionary Museum Corporation Painting of the Exterior of the St. Paul the Prospector Episcopal Church	Painting of the Exterior of the St. Paul the Prospector Episcopal Church	\$221,468.00	\$0.00
Washoe	Reno VFW Post 9211 Rehabilitation	Project consists of roof replacement to preserve existing structure, Exterior grading away from building to prevent foundation/cinderblock wall degradation. Hazmat remediation for Asbestos in parts of ceiling and all of flooring material as well as Radon Gas evacuation. This will be accomplished by HVAC upgrade/install; flooring install to encapsulate asbestos flooring, ceiling scraping and painting to remove asbestos containing acoustic texturing. Electrical work to accommodate HVAC as well as bring building up to current safety codes. Plumbing replacement for major areas to remove hazards and bring plumbing up to code. The flooring and Ceiling will get cosmetic updates to bring building back to baseline after remediation.	\$174,000.00	\$0.00
Eureka	Eureka Restoration Enterprise Masonic Lodge Restoration	Exterior Brick Restoration, restore/repair cross beams, window and door repairs	\$194,648.00	\$0.00
Washoe	Arts for All Nevada Lake Mansion Roof Replacement	Roof Replacement	\$96,925.00	\$0.00
Elko	City of Wells El Rancho Revitalization	Water, sewer, insulation, and sheet rocking of main floor	\$0.00	\$0.00
Carson	First Presbyterian Church of Carson City Old Sanctuary Preservation	Phase 1 - Repoint exterior two-story Bell Tower	\$117,850.00	\$0.00
Churchill	Fallon Community Theatre Inc Renovation of Historic Fallon Theatre	The projects include heating and cooling of the upper theatre and the lobby/bathrooms/concession stand area; completion of Phase 3 of the seismic rehabilitation plan; and replacement of the stage door to the alley along with moving the gas line and creating an exterior entrance.	\$125,004.00	\$0.00
Douglas	Douglas County - Town of Genoa Town Hall Rehabilitation	Construction of an ADA ramp, improvements to flooring, windows, doors and the façade. Add insulation to lower energy usage	\$110,390.00	\$0.00
Storey	Storey County - Pipers Opera House Front Door & Window Restoration Project	Restore 12 existing wood doors and repair/restore five window	\$107,375.00	\$0.00
Humboldt	North Central Nevada Historical Society Humboldt Museums Wood Structures Maintenance of Cedar Shingle Roofs, Windows and Exterior Paint	Replace/repair of Cedar Shingle Roofs, Windows, and Exterior Paint	\$19,527.00	\$0.00
Storey	St. Mary's Art Center Exterior Doors and Interior Carpentry and Masonry Rehabilitation Project	Rehabilitation of Four Exterior Doorways, Surrounds, and Wood Floor Print Room Brick and Stone Masonry Repointing of West Wall 1st Floor and Theatre Wood Floor Repairs and Refinishing 1st Floor Hallway Opening Restoration Elevator Addition Design & Engineering Seismic Retrofit Evaluation Alternative Scope: Lighting Upgrades and Potential Elevator Addition Scope	\$189,400.00	\$0.00

Cultural Centers and Historic Preservation Grant Program Project List

Location (County)	Project Title	Project Description	Bond Award/Budget Amount	Bond Expenditures to Date
Nye	Tonopah Historic Mining Park Foundation Desert Queen Complex Completion/Rope Shed (Bldg#7) Stabilization/Mizpah Complex Service Bay	Desert Queen - completion of Desert Queen Complex, including hoist house rehabilitation and addition of visitor safety features in order to open up the Desert Queen Hoist House for visitors. Rope Shed (Bldg #7) - stabilize building, it is in danger of collapse. Mizpah Mine Complex Service Bay - repair and bird-proof windows, remove bay doors to install historic vehicles associated with the mining park, install viewing panel in entryway so visitors can see inside.g#7) Stabilization/Mizpah Complex Service Bay	\$265,644.00	\$0.00
Douglas	Friends of Dangberg Home Ranch Bunkhouse - Preparation of HSR and Estimate of Future Restoration Costs	Preparation of a historic structure report and an estimate of future restoration costs for the ca. 1890 bunkhouse at Dangberg Home Ranch Historic Park. This application targets phase one of a two-phase project. The second phase, for which funding will be requested in the next CCCHP grant cycle, will complete full restoration of the bunkhouse in preparation for public access and related historic interpretation focusing on the lives of ranch workers in the early 20th century.	\$75,900.00	\$0.00
Carson	Brewery Arts Center Carson Brewing Company Safety Accessibility, Code Compliance and Facility Repair	Gutter maintainance, HVAC system replacement and repairs, elevator maintainance to be code compliant for accessibility needs, and fire sprinkler upgrades for building safety requirements.	\$100,467.00	\$0.00
Carson	Brewery Arts Center St. Teresa's Church Safety Code Compliance and Facility Repair	Installation and gutter maintainance, HVAC system replacement and repairs, and fire sprinkler upgrades for building safety requirements.	\$26,830.00	\$0.00
Mineral	Mineral County Old Esmerelda Mineral County Courthouse Restoration	Historic Structures Report	\$44,860.00	\$0.00
Carson	Nevada State Prison Preservation Society Project	Rehabilitation of the Cell House Steps	\$79,348.00	\$0.00
Mineral	Old Glory Theatre Inc Cactus Theatre Rehabilitation	Update theater seating to ADA standards, reinstall historic permanent poster stands, and fix a badly repaired patch job on the front facing exterior of the building.	\$9,200.00	\$0.00
White Pine	White Pine Community Choir Association Centennial Fine Arts Center ADA Access Phase II	This projects entails completion of the ADA access. Phase One included constmtn of the elevator shaft, installation of a new exterior door to access the elevator, and electrical upgrades to increase the building's carrying capacity to accommodate the elevator. The major compnents of Phase Two are to purchase and install the elevator, build an ADA compliant ramp to access the lower level, and install the electrical and mechanical equipment for the elevator system	\$305,108.00	\$0.00
White Pine	City of Ely Historic City Hall Renovation - Construction Phase	Multiple Construction Activities	\$0.00	\$0.00
White Pine	Nevada Northern Railway Foundation Air-Brake Building - Urgent Building Repairs	The Nevada Northern Railway National Historic Landmark (NHL), comprises sixty buildings and structures that were constructed amidst market uncertainty in 1907. Essential buildings, as the Air Brake Building, were built with minimal materials, leading to its current deterioration. A previous CCA/CCCHP grant repaired the Air Brake building's roof and restored neighboring shop structures. Restoring the Air Brake Building will maintain our visual integrity, helping us live up to our NHL nomination, which states, "Visually, the historic district has changed very little in appearance since ca. 1915 or 1920." Awarding this grant will continue the successful preserving of this NHL for generations to come.	\$176,105.50	\$0.00
